SIGNING CEREMONY LOS ANGELES PRESS RELEASES

ONE2LEARN X ENGAGE SYSTEMS

ENGLISH

Engage Systems LLC and One2Learn SRL announce the signing of a memorandum of understanding strengthening their existing partnership in the field of Adobe Digital Learning customer training. Over the past five years, the two companies have developed a unique customer training program that has already helped numerous US commercial and government customers get the most out of their Adobe Digital Learning solution.

Through this training program, we are committed to our customers' success by providing complimentary training designed to help them get the most out of their investment in Adobe Digital Learning solutions, so they can deliver the world-class learning experience their learners deserve.

Based in San Diego, California, Engage System LLC is a long-standing Adobe Digital Learning solutions provider and reseller. Engage Systems is dedicated to providing their clients and prospects with attentive and highly personalized service.

One2Learn SRL is a Belgium-based company offering a wide range of eLearning services. A long-standing Adobe Digital Learning partner One2Learn has authored several books on Adobe Captivate (Authoring tool) and Adobe Learning Manager (LMS) and delivers training on these and related technologies worldwide.

FRANCAIS

Engage Systems LLC et One2Learn SRL annoncent la signature d'un protocole d'accord renforçant leur partenariat existant dans le domaine de la formation des client aux solutions Adobe Digital Learning. Au cours des cinq dernières années, les deux sociétés ont développé un programme de formation client unique qui a déjà aidé de nombreuses entreprises et administrations américaines à tirer le meilleur parti de leur solution Adobe Digital Learning.

Grâce à ce programme de formation, nous nous engageons à favoriser la réussite de nos clients en leur proposant des formations gratuites conçues pour les aider à tirer le meilleur parti de leur investissement dans les solutions Adobe Digital Learning, afin qu'ils puissent proposer à leurs apprenants les expériences d'apprentissage de premier ordre qu'ils méritent.

Basée à San Diego, Californie, Engage System LLC est un prestataire et revendeur de longue date des solutions Adobe Digital Learning. Engage Systems s'engage à fournir à ses clients et prospects un service attentif et hautement personnalisé.

One2Learn SRL est une société belge proposant une large gamme de services eLearning. Partenaire de longue date d'Adobe Digital Learning, One2Learn a publié plusieurs ouvrages sur Adobe Captivate (outil de création) et Adobe Learning Manager (LMS) et dispense des formations sur ces technologies et d'autres domaines connexes dans le monde entier.

NEDERLANDS

Engage Systems LLC en One2Learn SRL kondigen de ondertekening aan van een memorandum van overeenstemming waarmee hun bestaande samenwerking op het gebied van klanttraining voor Adobe Digital Learning-oplossingen wordt versterkt. In de afgelopen vijf jaar hebben beide bedrijven een uniek klanttrainingsprogramma ontwikkeld dat al tal van Amerikaanse bedrijven en overheidsinstanties heeft geholpen om het maximale uit hun Adobe Digital Learning-oplossing te halen.

Met dit trainingsprogramma zetten we ons in om het succes van onze klanten te bevorderen door hen gratis trainingen aan te bieden die zijn ontworpen om hen te helpen het maximale uit hun investering in Adobe Digital Learning-oplossingen te halen, zodat zij hun leerlingen de eersteklas leerervaringen kunnen bieden die zij verdienen.

Engage System LLC, gevestigd in San Diego, Californië, is een langdurige leverancier en wederverkoper van Adobe Digital Learning-oplossingen. Engage Systems streeft ernaar zijn klanten en prospects een attente en zeer gepersonaliseerde service te bieden.

One2Learn SRL is een Belgisch bedrijf dat een breed scala aan e-learningdiensten aanbiedt. Als langdurige partner van Adobe Digital Learning heeft One2Learn verschillende boeken gepubliceerd over Adobe Captivate (ontwerptool) en Adobe Learning Manager (LMS) en geeft het wereldwijd trainingen over deze technologieën en aanverwante onderwerpen.

THOMAS MORE X COLLEGE OF THE CANYONS

NEDERLANDS

Zorgonderwijs zonder grenzen: Thomas More en College of the Canyons verlengen samenwerking

Los Angeles, 9 oktober 2025 – Tijdens de Belgische Economische Missie naar de Westkust van de VS ondertekent Thomas More op 9 oktober een nieuw akkoord met het toonaangevende College of the Canyons (COC) uit Santa Clarita. De ceremonie vindt plaats in Los Angeles in aanwezigheid van Prinses Astrid, COC-CEO David C. Andrus en Thomas More-directeur Stijn Coenen. Het partnerschap toont hoe Vlaanderen en Californië samen werken aan zorgonderwijs.

De motor is COIL: Collaborative Online International Learning. Studenten ontmoeten elkaar in een digitaal klaslokaal, live en interactief. Geen vliegtickets, wel écht verbinden. Vorig academiejaar werkten 50 eerstejaarsstudenten Verpleegkunde van Thomas More in Mechelen en Santa Clarita samen rond medicatieveiligheid. Daarna bogen gemengde teams zich over casussen, begeleid door docenten uit beide landen. “Voor onze studenten was het eerst wennen - ook omdat Engels niet hun moedertaal is - maar ze merkten hoe universeel zorgvragen zijn”, zegt Cindy Heremans van Verpleegkunde Mechelen. “Dat was enorm verrijkend.”

Volgens algemeen directeur Stijn Coenen toont het project de kracht van digitalisering: “Afstand bestaat niet als je echt wil samenwerken. Studenten leren internationaal denken, zonder verplaatsing of hoge kosten. Dat is onderwijs anno 2025.”

De verlenging van de samenwerking brengt nieuwe plannen. In juni 2026 organiseert Thomas More een Summer School in België: ‘Cross Cultural Healthcare: A Nursing Journey in Belgium’. Studenten van COC en andere internationale partners ontdekken er het Europese zorgsysteem via simulaties, studiebezoeken en interculturele activiteiten. In 2027 volgt een spiegelprogramma in Californië.

En het blijft niet bij zorg. Beide instellingen verkennen ook samenwerking in media en entertainment, een sector waarin Californië wereldwijd toonaangevend is. Onderwijs zonder grenzen dus.

FRANCAIS

Enseignement sans frontières dans le domaine des soins de santé : Thomas More et le College of the Canyons prolongent leur collaboration

Los Angeles, le 9 octobre 2025 – Dans le cadre de la mission économique belge sur la côte ouest des États-Unis, Thomas More signe le 9 octobre un nouvel accord avec le prestigieux College of the Canyons (COC) de Santa Clarita. La cérémonie se déroulera à Los Angeles en présence de la princesse Astrid, du PDG du COC David C. Andrus et du directeur de Thomas More Stijn Coenen. Ce partenariat illustre la collaboration entre la Flandre et la Californie dans le domaine de l'enseignement des soins de santé.

Le moteur est le COIL: Collaborative Online International Learning (apprentissage international collaboratif en ligne). Les étudiants se rencontrent dans une salle de classe numérique, en direct et de manière interactive. Pas de billets d'avion, mais une véritable connexion. L'année dernière, 50 étudiants de première année en soins infirmiers de Thomas More à Malines et Santa Clarita ont travaillé ensemble sur la sécurité des médicaments. Ensuite, des équipes mixtes se sont penchées sur des cas, guidées par des enseignants des deux pays. “Nos étudiants ont d'abord dû s'habituer, notamment parce que l'anglais n'est pas leur langue maternelle, mais ils ont remarqué à quel point les questions de soins sont universelles”, explique Cindy Heremans, de la faculté de soins infirmiers de Malines. “Cela a été extrêmement enrichissant.”

Selon le directeur général Stijn Coenen, le projet démontre la puissance de la numérisation: “La distance n'existe pas lorsque l'on souhaite vraiment collaborer. Les étudiants apprennent à penser à l'échelle internationale, sans déplacement ni frais élevés. C'est l'enseignement de 2025.”

La prolongation de la collaboration s'accompagne de nouveaux projets. En juin 2026, Thomas More organisera une université d'été en Belgique: “Cross Cultural Healthcare: A Nursing Journey in Belgium”. Les étudiants du COC et d'autres partenaires internationaux y découvriront le système de soins européen à travers des simulations, des visites d'étude et des activités interculturelles. En 2027, un programme similaire sera organisé en Californie.

Et cela ne s'arrête pas aux soins de santé. Les deux institutions explorent également la possibilité d'une coopération dans le domaine des médias et du divertissement, un secteur dans lequel la Californie est leader mondial. L'éducation sans frontières, en somme.

ENGLISH

Healthcare education without borders: Thomas More and College of the Canyons extend collaboration

Los Angeles, October 9, 2025 – During the Belgian Economic Mission to the West Coast of the US, Thomas More will sign a new agreement on October 9 with the leading College of the Canyons (COC) of Santa Clarita. The ceremony will take place in Los Angeles in the presence of Princess Astrid, COC CEO David C. Andrus, and Thomas More director Stijn Coenen. The partnership demonstrates how Flanders and California are working together on healthcare education.

The driving force behind this is COIL: Collaborative Online International Learning. Students meet in a digital classroom, live and interactively. No plane tickets, but real connections. Last academic year, 50 first-year nursing students from Thomas More in Mechelen and Los Angeles worked together on medication safety. Mixed teams then examined case studies, supervised by teachers from both countries. “It took some getting used to for our students, partly because English is not their mother tongue, but they realized how universal healthcare issues are,” says Cindy Heremans of Nursing Mechelen. “That was hugely enriching.”

According to general director Stijn Coenen, the project demonstrates the power of digitization: “Distance is no obstacle if you really want to collaborate. Students learn to think internationally, without having to travel or incur high costs. That's education in 2025.”

The extension of the collaboration brings new plans. In June 2026, Thomas More will organize a Summer School in Belgium: ‘Cross Cultural Healthcare: A Nursing Journey in Belgium’. Students from COC and other international partners will discover the European healthcare system through simulations, study visits, and intercultural activities. A mirror program in California will follow in 2027.

And it doesn't stop at healthcare. Both institutions are also exploring collaboration in media and entertainment, a sector in which California is a global leader. Education without borders, in other words.

ACE GOOD X JMJ EMOTION PICTURES

LOS ANGELES, OCTOBER 9, 2025 — The Academy of Motion Picture Arts and Sciences will host a landmark announcement: the official signing of a partnership between **Euzhan Palcy**, Academy Award-winning filmmaker, and **Grégory Monfort**, CEO of **ACE Good**.

This collaboration marks the first time a globally acclaimed director joins forces with a blockchain pioneer to reshape the way films are financed, distributed, and experienced.

Through the tokenization of real-world assets (RWA), ACE Good enables filmmakers to secure transparent financing while opening new high-yield opportunities for investors worldwide.

Euzhan Palcy, recognized for her groundbreaking work and cultural legacy, brings unmatched artistic vision to this alliance. Her decision to explore blockchain-powered solutions reflects her commitment to innovation and inclusivity in cinema.

As part of this partnership, Palcy is also considering the use of **OneTicket**, ACE Good’s blockchain-based ticketing platform, to offer audiences a **new, immersive cinema-going experience** where tickets become digital assets and gateways to exclusive content.

This initiative represents a global milestone: ensuring that powerful stories reach the screen while audiences and investors alike benefit from transparency and technological advancement.

By combining Palcy’s legacy with ACE Good’s expertise, the partnership symbolizes a bold step into the future of film, where tradition meets innovation.

The announcement precedes ACE Good’s participation for the next Cannes Festival edition.

For press inquiries and interview opportunities, please contact: info@acegood.net

ACE GOOD X BEEYOU.TV INC

ENGLISH

Los Angeles, 2025 Oct 9th – Beeyou.tv, the all-in-one live streaming and monetization platform, announces a new partnership with AceGood’s “One Ticket.”

This integration brings blockchain-powered NFT ticketing directly into Beeyou.tv.

Creators, artists, and communities can now sell tickets for both live and virtual events.

Each ticket is unique, fraud-proof, and verifiable on the blockchain.

Fans enjoy a seamless purchase experience with card, PayPal, or Apple Pay.

Tickets double as digital collectibles, preserving memories long after the event.

The new service protects creators from counterfeit tickets and unauthorized resales.

Beeyou.tv's ecosystem now combines production studio, streaming, donations, auctions, and NFT ticketing.

This makes it the first platform to unify all creator monetization tools.

A pilot program will launch with music and education events in 2025.

"We care about creators — secure ticketing is the next step," said the team.

FRANCAIS

Los Angeles, 2025 Oct 9 – Beeyou.tv, la plateforme intégrée de streaming et de monétisation, annonce un partenariat avec One Ticket d'AceGood.

Cette intégration apporte la billetterie NFT sécurisée par blockchain sur Beeyou.tv.

Les créateurs, artistes et communautés peuvent vendre des billets pour des événements en direct et virtuels.

Chaque billet est unique, infalsifiable et vérifiable sur la blockchain.

Les fans bénéficient d'un achat simple via carte, PayPal ou Apple Pay.

Les billets deviennent aussi des souvenirs numériques et collectionnables.

Le service protège contre les contrefaçons et la revente illégale.

Beeyou.tv combine désormais studio de production, streaming, dons, enchères et billetterie NFT One Ticket d'AceGood.

C'est la première plateforme à réunir tous ces outils de monétisation.

Un programme pilote sera lancé avec des concerts et formations en 2025.

« Nous mettons les créateurs au centre — la billetterie sécurisée est une étape clé. »

NEDERLANDS

Los Angeles, 2025 Oct 9 – Beeyou.tv, het alles-in-één platform voor livestreaming en inkomsten, kondigt een samenwerking aan met One Ticket van AceGood.

Hiermee brengt Beeyou.tv blockchain-gebaseerde NFT-ticketing naar creators en artiesten.

Tickets zijn nu beschikbaar voor zowel live als virtuele evenementen.

Elk ticket is uniek, fraude-proof en verifieerbaar.

Fans kopen eenvoudig met kaart, PayPal of Apple Pay.

Tickets worden ook digitale verzamelobjecten en herinneringen.

Organisatoren zijn beschermd tegen valse tickets en doorverkoop.

Artiesten ontvangen inkomsten rechtstreeks van hun fans.

Fans genieten van echte en exclusieve toegang.

Beeyou.tv biedt nu production studio, streaming, donaties, veilingen én ticketing.

Daarmee is het de eerste alles-in-één oplossing voor creators.

Een pilotprogramma start in 2025 met muziek- en onderwijsprojecten.

BELGIQA X MADERA

Belgiqa and MADERA Surfaces Sign Memorandum of Understanding

Los Angeles, CA — [Insert Date] — Belgiqa, renowned for its innovative wood products and finishes, and MADERA Surfaces, leader in Seamless Wood Design, have signed a Memorandum of Understanding (MoU).

The agreement establishes Belgiqa as a resource partner for products and finishing solutions within MADERA's system.
MADERA will promote these offerings under its Seamless Wood Design platform, ensuring architects, designers, and builders access a fully integrated approach.

This understanding allows MADERA to deliver consistent design intent and execution across projects at any scale. Belgiqa's craftsmanship and finishing expertise further enhance the performance and aesthetic of Seamless Wood Design.

The collaboration strengthens both brands' commitment to raising standards in wood surfaces. It also provides the A+D community with confidence in unified solutions backed by international expertise.

This MoU underscores the shared vision: to make wood design seamless, refined, and future-ready.

MADERA's Seamless Wood Design® is a groundbreaking solution that solves the challenge of coordinating wood finishes across multiple surfaces. From flooring, wall and ceiling paneling, stair systems, interior doors, millwork, slats, and box beams, our system seamlessly aligns the product, species, color, and grade. This adaptable framework delivers a bespoke aesthetic that streamlines the design and build process.

COBBS BELUX BV X ANDURIL INDUSTRIES

Belgium and Anduril Advance Defense Partnership
Anduril Industries and Cobbs Belux sign MOU to Explore Defence System Localisation in Belgium.

Costa Mesa, CA – October 13, 2025 – Anduril Industries and Belgian defense company COBBS today announced the signing of a Memorandum of Understanding (MOU) to expand Belgium's defense industrial base through

local assembly, sustainment, and training of Anduril systems.

The agreement was signed during a visit by the Belgian Minister of Defense to Anduril's California headquarters — a visit that underscored Belgium's commitment to innovation and sovereignty. The Minister met with Anduril engineers, toured advanced manufacturing lines, and observed live demonstrations of Anduril's Lattice AI platform, before endorsing the new partnership.

The MOU establishes the foundation for Anduril's first industrial footprint in Belgium. As part of the agreement, Anduril will open a Belgian office and work with COBBS to build local capacity for workforce training and sustainment of advanced defense technology.

"Anduril is making a long-term commitment to Belgium. Working with COBBS, we will assemble, sustain, and train in-country to strengthen sovereignty, resilience, and NATO collaboration," said Brian Schimpf, CEO of Anduril Industries.

"Belgium welcomes Anduril's commitment to our defense industrial base," said [Name], Belgian Minister of Defense. "This partnership with COBBS demonstrates the value of working with innovative defense technology companies that are willing to invest locally and support our long-term security, sovereignty, and commitments to NATO and our allies."

CENTRE SPATIAL DE LIÈGE X CALTECH

UVEX is a new NASA Medium Explorer mission to explore the ultraviolet sky, with an expected launch date in 2030. With a wide-field, two-band ultraviolet imager and long, multi-width slit spectrometer, UVEX is equipped to address key scientific themes identified in *Pathways to Discovery in Astronomy & Astrophysics for the 2020s (Astro2020).* UVEX will undertake a synoptic survey of the entire sky in the near-UV and far-UV, probing the dynamic universe with a sensitivity more than 50 times better than GALEX. UVEX would also have a powerful broadband spectroscopic capability. UVEX would address fundamental questions from the Astro2020 Decadal Survey, and study the evolution of low-metallicity, low-mass galaxies. UVEX time-domain surveys could probe the aftermaths of gravitational wave-discovered compact object mergers, discover fast UV transients, and diagnose the early stages of explosive phenomena.

UVEX will address outstanding questions in our understanding of the Universe, including the nature of the low-mass, low-metallicity galaxy population and the early ultraviolet emission of explosive transients. UVEX will also leave a rich legacy of all-sky ultraviolet data. Three main topics will be dealt by UVEX:

- The Low-Mass, Low-Metallicity Galaxy Frontier
- New Views of the Dynamic Universe
- A Legacy of Deep, Synoptic All-Sky Data

The major CSL responsibilities in UVEX are focusing on technically leading the instrument FUV calibration test of the telescope. During the Phase A, the CSL-team supported the UVEX consortium in preparing the calibration plan of the instrument and deriving the associated facility design and specifications. CSL therefore provided expertise in deriving the calibration plan of the UVEX telescope, along with the design of the required Ground Support Equipment (GSE) to effectively perform the calibration campaign as a subsequent task in Phase C/D.

UNIVERSITY OF GHENT X TERASAKI INSTITUTE OF BIOMEDICAL INNOVATION

ENGLISH

Ghent University and the Terasaki Institute enter a structured Memorandum of Understanding to foster collaborative research and translation in tissue engineering, organ-on-a-chip, biomaterials, biosensors, and AI. The Parties will establish a joint steering group to set priorities, coordinate workstreams, and review progress against agreed milestones. Faculty, researchers, and trainees will be exchanged through short- and long-term visits, with reciprocal access to facilities, core labs, and specialized equipment. Collaborations will include co-designed projects, shared datasets and models, and harmonized protocols to ensure rigor, reproducibility, and scalability. Both institutions commit to responsible data governance, including privacy, security, and compliance with applicable ethical and regulatory standards. Intellectual property arising from joint work will be managed under mutually agreed terms that enable academic dissemination and fair pathways to commercialization. Results will be disseminated through co-authored publications, joint seminars, and conference symposia, with transparent contribution and authorship guidelines.

The Parties will pursue coordinated grant applications and co-funded initiatives to accelerate development and de-risk translation. Training programs will include workshops, short courses, and mentorship aimed at building capacity across biology, engineering, and data science. This MOU defines the framework, roles, and mechanisms required to execute impactful, measurable, and sustainable collaboration.

NEDERLANDS

De Universiteit Gent en het Terasaki Institute sluiten een gestructureerde samenwerkingsovereenkomst (Memorandum of Understanding, MoU) om samen fundamenteel onderzoek en klinische translatie te versterken op het vlak van weefselengineering, organ-on-a-chip, biomaterialen, biosensoren en AI. De Partijen richten een gezamenlijke stuurgroep op om prioriteiten te bepalen, werkstromen te coördineren en de voortgang op te volgen ten opzichte van afgesproken mijlpalen. Docenten, onderzoekers en trainees worden uitgewisseld via korte en lange verblijven, met wederzijdse toegang tot faciliteiten, core labs en gespecialiseerde apparatuur. De samenwerking omvat co-ontworpen projecten, gedeelde datasets en modellen, en geharmoniseerde protocollen die de kwaliteit, reproduceerbaarheid en opschaalbaarheid waarborgen. Beide instellingen verbinden zich tot verantwoord databeheer, inclusief privacy, veiligheid en naleving van ethische en regelgevende standaarden. Intellectuele eigendom die voortvloeit uit gezamenlijk werk wordt beheerd onder wederzijds overeengekomen voorwaarden die academische kennisdeling en eventuele valorisatie en commercialisering mogelijk maken. Resultaten worden verspreid via gezamenlijke publicaties, seminars en congres-symposia, met transparante richtlijnen voor bijdrage en auteurschap.

De Partijen zullen gecoördineerde subsidieaanvragen en co-gefinancierde initiatieven nastreven om ontwikkeling te versnellen en de risico's inherent aan translatie te verkleinen. Opleidingsprogramma's omvatten workshops, korte cursussen en mentorschap, gericht op capaciteitsopbouw over biologie, engineering en datawetenschap heen. Dit MoU bepaalt het kader, de rollen en de mechanismen die nodig zijn om een impactvolle, kwantificeerbare en duurzame samenwerking te realiseren.

FRANCAIS

L'Université de Gand et l'Institut Terasaki signent un protocole d'accord structuré (Memorandum of Understanding, MoU) afin de promouvoir de façon collaborative la recherche et la translation en ingénierie tissulaire, organes-sur-puce, biomatériaux, biocapteurs, et IA. Les de parties mettront en place un comité de pilotage conjoint pour fixer les priorités de collaboration, coordonner les axes de travail et examiner l'avancement par rapport aux jalons convenus. Les professeurs, chercheurs et stagiaires participeront à des échanges dans le cadre de visites de courte et de longue durée, avec un accès réciproque aux plateformes, laboratoires, et équipements spécialisés disponibles au sein des deux institutions. Les collaborations

comprendront des projets co-conçus, des données et modèles partagés, ainsi que des protocoles garantissant la rigueur, la reproductibilité et l'évolutivité des recherches scientifiques entreprises. Les deux institutions s'engagent à une gouvernance responsable des données, incluant la protection de la vie privée, la sécurité et le respect des normes éthiques et réglementaires applicables. La propriété intellectuelle issue des travaux conjoints sera gérée selon des modalités convenues permettant la diffusion académique et des voies équitables vers la valorisation et la commercialisation. Les résultats seront diffusés par des publications co-signées, des séminaires communs et des symposiums de conférence, avec des lignes directrices transparentes en matière de contributions et d'attributions.

Les deux Parties poursuivront des demandes de financement coordonnées et des initiatives cofinancées afin d'accélérer le développement scientifique et de réduire les risques liés à la translation. Les programmes de formation comprendront des ateliers, des cours et du mentorat visant à renforcer les capacités à l'interface de la biologie, de l'ingénierie et de l'IA. Ce MoU définit le cadre, les rôles et les mécanismes nécessaires à la mise en œuvre d'une collaboration porteuse d'impact, mesurable et durable.

GREENWIN, DISTRICT CLEANTECH X LARTA INSTITUTE

Belgian Innovation Leaders to Join Forces with Larta Institute for Cleantech Collaboration, under the auspices of HRH Princess Astrid of Belgium, representing the King of the Belgians.

Los Angeles, CA – On October 4-12, 2025, two leading Belgian organisations – GreenWin and District Cleantech formalized a strategic partnership with the Larta Institute, a renowned US-based technology accelerator. This Memorandum of Understanding (MoU) signing ceremony, held during the Belgian Economic Mission to California, aims to foster innovation and promote collaborative research, development, and innovation (R&D&I) projects in the cleantech sector.

The MoU establishes a framework for ongoing cooperation aimed at commercialising new products, services, and processes developed by the partners' members. It also seeks to enhance international business activities through joint missions, delegation hosting, and start-up exchange initiatives.
By accelerating access to funding and strengthening cross-border networks, the partnership will boost cleantech industry growth and sustainability on both sides of the Atlantic.

Attended by high-level dignitaries including Her Royal Highness Princess Astrid of Belgium and senior government officials from Belgium and California, the ceremony underscores the importance of transatlantic collaboration in tackling global environmental challenges through innovation.

RENSON X MADERA

MADERA Showcases RENSON Outdoor Living in Arts District Showroom to Inspire A+D Community

Los Angeles, CA – MADERA, the leader in Seamless Wood Design, is pleased to announce that its Arts District showroom in Los Angeles will now feature the RENSON Camargue® pergola, offering architects and designers a firsthand experience with one of the world's most advanced outdoor living concepts.

This initiative is not about sales—it's about inspiration. By showcasing RENSON's Camargue in its design hub, MADERA is creating a space where the A+D community can explore more products under one roof, fostering deeper connections, fresh ideas, and collaborative conversations.

Both MADERA and RENSON share a passion for design integrity and innovation. While MADERA specializes in high-end wood surfaces, RENSON is globally recognized for its architectural outdoor systems. Bringing these solutions together in a single showroom gives architects and designers access to more tools, materials, and expertise to elevate their projects.

“Our mission has always been to serve the A+D community with solutions that inspire and simplify the design process,” said Gilles Vanpoucke, CCO at MADERA. “By showcasing RENSON in our Arts District space, we’re not selling their products—we’re simply making it easier for architects and designers to experience more high-quality options in one place.”

“Like MADERA, RENSON believes in bringing beauty and performance together,” said Maxim De Vriesse, Export Manager at RENSON. “We’re excited that the Los Angeles design community will now be able to engage with the Camargue in such an inspiring setting.”

The Camargue installation at MADERA’s showroom highlights the power of collaboration across specialties and reflects a growing effort to give the A+D community immersive access to world-class design products—all in the heart of the Arts District.

THEGREENSHOT X SETSWAP LLC

TheGreenShot is an international group operating in Europe, the United States, and Canada. TheGreenShot provides production management solutions for the film, television, advertising, event, festival, theatre, animation, video game, and studio industries.

Its web and mobile applications, already adopted by 20,000 users, enable real-time planning, management, and automation of budgets, operations, production processes, and carbon footprint management.

TheGreenShot also offers services in green management, payroll, consulting, and training. With 20 open interfaces, the platform integrates seamlessly into clients' IT infrastructures.

Founded in 2021, TheGreenShot currently employs 70 people across Belgium, France, the United States, and Canada. The company has won 13 international awards and received the Solar Impulse Efficient Solutions label. Supported by Creative Europe MEDIA, Finance & Invest Brussels, and FEDER, TheGreenShot has also joined the CSAIL Artificial Intelligence Lab at MIT in the United States.

THE Y-HOUSE X 22D MUSIC GROUP

ENGLISH

The Y-house signs a strategic agreement with 22D Music Group

After co-producing and supervising the music of *I'M NOT A ROBOT* — winner of the 2025 Academy Award for Best Live Action Short Film — The Y-house takes a new step forward by entering into a major partnership with 22D Music Group, an international reference in music publishing and distribution. This agreement marks a turning point for The Y-house for two essential reasons:

- **Rights management and collection**: 22D will conduct an in-depth process of collecting and managing publishing rights covering the past five years, across all films co-produced by The Y-house whose music was created in-house, as well as for upcoming co-productions.

- **Distribution of film scores**: 22D will also support the release and promotion of original soundtracks produced by The Y-house. In spring 2026, with the theatrical release of *RAVENS* (co-produced by The Y-house and distributed in the Benelux by Galeries Distribution), it is foreseen — subject to the finalization of ongoing negotiations with 22D — that the original score will be available and promoted on all major platforms.

This partnership underlines The Y-house's ambition to strengthen its dual positioning: both as a co-producer of ambitious auteur films and the creator of an original music catalogue, now comprising six soundtracks with a hundred titles.

FRANÇAIS

The Y-house signe un accord stratégique avec 22D Music Group

Après avoir coproduit et supervisé la musique de ***I'M NOT A ROBOT*** — Oscar du Meilleur court métrage en prises de vues réelles en 2025 — The Y-house franchit une nouvelle étape en concluant un partenariat majeur avec 22D Music Group, référence internationale en matière d'édition et de distribution musicale. Cet accord marque un tournant pour The Y-house pour deux raisons essentielles :

- **Gestion et collecte de droits** : 22D mènera un travail approfondi de collecte et de gestion des droits d'édition musicale couvrant les cinq dernières années, sur l'ensemble des films coproduits par The Y-house dont la musique a été créée en interne, ainsi que sur les nouvelles coproductions à venir.

- **Distribution des musiques de films** : 22D accompagnera également la diffusion et la valorisation des bandes originales produites par The Y-house. Au printemps 2026, à l'occasion de la sortie en salles de *RAVENS* (coproduit par The Y-house et distribué au Benelux par Galeries Distribution), il est prévu — sous réserve de la finalisation des négociations actuellement en cours avec 22D — que la musique originale soit disponible et promue sur toutes les principales plateformes.

Ce partenariat illustre la volonté de The Y-house de renforcer son double positionnement : à la fois comme coproducteur de films d'auteur ambitieux et comme créateur d'un catalogue musical original, aujourd'hui riche de six bandes originales et d'une centaine de titres.

NEDERLANDS

The Y-house sluit een strategische overeenkomst met 22D Music Group

Na de coproductie van ***I'M NOT A ROBOT*** — winnaar van de Oscar voor Beste Korte Fictiefilm in 2025 — zet The Y-house een nieuwe stap vooruit door een belangrijk partnerschap aan te gaan met 22D Music Group, een internationale referentie op het gebied van muziekuitgave en distributie. Deze overeenkomst betekent een keerpunt voor The Y-house om twee essentiële redenen:

- **Beheer en inning van rechten**: 22D zal een grondige taak uitvoeren op het gebied van de inning en het beheer van muziekauteursrechten die de afgelopen vijf jaar zijn opgebouwd, voor alle films die door The Y-house zijn gecoproduceerd waarvan de muziek intern werd gecreëerd, evenals voor toekomstige coproducties.

- **Distributie van filmmuziek**: 22D zal ook de verspreiding en valorisatie ondersteunen van de originele soundtracks die door The Y-house zijn geproduceerd. In het voorjaar van 2026, ter gelegenheid van de bioscooprelease van *RAVENS* (gecoproduceerd door The Y-house en in de Benelux gedistribueerd door Galeries Distribution), is het de bedoeling — onder voorbehoud van de afronding van de lopende onderhandelingen met 22D — dat de originele soundtrack beschikbaar zal zijn en gepromoot wordt op alle grote platforms.

Dit partnerschap benadrukt de ambitie van The Y-house om zijn dubbele positionering te versterken: zowel als coproductiepartner van ambitieuze auteurfilms, als als schepper van een originele muziekcatalogus die vandaag zes soundtracks en een honderdtal titels omvat.

TONOMIA SRL X NAMLA CLOUD EDGE

San Francisco, October 9, 2025 – Tonomia, a Belgian cleantech and AI infrastructure company based in the Province of Liège, and Namla Cloud Edge, a software leader in edge AI applications Today signed a strategic partnership agreement during the Belgian Economic Mission to the United States, presided over by HRH Princess Astrid.

This agreement highlights the strong potential of Tonomia in the fields of sustainable AI infrastructure for Telecom, smart cities and security applications.
