	TURKEY	October 14 - 19	
	AUSTRALIA & NEW ZEALAND	November 18 -28	 

(The dates are subject to change)

HRH PRINCE PHILIPPE OF BELGIUM

HRH Prince Philippe was born on April 15, 1960, in Brussels, Belgium, as the first child of HM King Albert II and HM Queen Paola. He is first in line for succession to the throne of Belgium and, as such, bears the title of Duke of Brabant.

On December 4, 1999, the Prince married Miss Mathilde d'Udekem d'Acoz.

On October 25, 2001, Princess Mathilde gave birth to a daughter, Princess Elisabeth. Her brother, Prince Gabriel, was born on August 20, 2003. On October 4, 2005, Princess Mathilde gave birth to Prince Emmanuel. Princess Eléonore, the fourth child, was born on April 16, 2008.

At the end of secondary school, which he attended both in French and Dutch, the Prince continued his education at the Royal Military Academy, where he graduated in 1981. He then subsequently qualified as a fighter pilot (1982), a paratrooper and commando officer before assuming command over a paratrooper platoon. The Prince's military career further led him to his current rank of Lieutenant General and Vice Admiral in the Armed Forces (as of March 2010).

Prince Philippe completed his academic training at Trinity College, University of Oxford (UK) and at the Graduate School of Stanford University (USA), where he completed a Master of Arts Degree in political science in 1985.

The Prince holds an Honorary Doctorate from the Katholieke Universiteit Leuven (2002).

As a result of his increasing number of commitments, the "Household of Prince Philippe" was created in 1992.

On August 6, 1993, by government decree, Prince Philippe was appointed Honorary Chairman of the Belgian Foreign Trade Board (BFTB). He succeeded his father, who had been Honorary Chairman since 1962.

In this capacity, Prince Philippe has headed more than 40 important economic missions, the most recent being to China & Hong-Kong and Bahrain & Qatar (2007); USA (Seattle) & Canada (Vancouver), Egypt, Argentina & Uruguay and Indonesia & Singapore (2008); Mexico & Panama, the Republic of Korea, the Kingdom of Saudi Arabia and Morocco (2009); India, Brazil, Kazakhstan and Ukraine (2010); Russia and just recently, the United States of America (2011).

On May 3, 2003, Prince Philippe was appointed Honorary Chairman of the Board of the Foreign Trade Agency, replacing the BFTB.

On June 21, 1994 he became a member of the Senate.

In addition to his various official duties, Prince Philippe concentrates on gaining more in-depth knowledge of his country and its role and image in the world and international relations.

The Prince is keenly interested in the situation of young people and their integration in the society of tomorrow. He regularly visits schools and universities, but also

closely follows such important social issues as unemployment and the struggle against poverty and exclusion.

In May 1997, Prince Philippe was appointed Honorary Chairman of the Belgian Federal Council for Sustainable Development, created after the Conference of Rio.

In 1998, The Prince Philippe Fund was created, with the aim of fostering exchanges between citizens and organizations across all three Communities of Belgium.

In 2003, Prince Philippe became Honorary Chairman of BIO (Belgian Investment Company for Developing Countries).

Since 2004, Prince Philippe has also served as the Honorary Chairman of the European Chapter of the Club of Rome and of the International Polar Foundation.

In May 2004, Prince Philippe obtained his license as a civilian helicopter pilot.

He spends his rare leisure time at home with his family and enjoys reading, especially on subjects related to the problems and challenges confronting men and women in today's society. He is an avid sportsman and is keen on maintaining a healthy physical condition.

HE STEVEN VANACKERE

Deputy Prime Minister and
Minister of Foreign Affairs and Institutional Reform of Belgium

Born on February 4th, 1964

ACADEMIC CAREER

- **Bachelor in Political Science**
K.U. Leuven, 1985

Agoria is Belgium's largest employers' organisation and trade association representing more than 1,600 member companies active in the technology industry in Belgium.

Its Automotive Division was set up to represent the Belgian vehicle industry. **Agoria Automotive** defends the interests of the manufacturers of cars, buses, trucks, trailers, bicycles and the supply industry.

The vehicle industry is very important for Belgium. Every year over 500,000 passenger cars and over 40,000 commercial vehicles, buses and coaches roll off the assembly and production lines. Belgium has one of the highest motor vehicle production per capita in the world. The export ratio for assembled vehicles exceeds 90%. Moreover there is an abundance of suppliers focused on leading-edge technologies. Approximately 300 companies create added value for the vehicle industry. They are engaged in a large range of activities: from research and design to production, testing and certification.

Directly and indirectly nearly 10% of the Belgian industrial workforce is employed by the vehicle industry.

info@awdc.be
www.awdc.be

The Antwerp World Diamond Centre (AWDC) is the coordinating body and the official representative of the Antwerp diamond sector, both at home and abroad. As such, AWDC strives to further strengthen Antwerp as the world's primary business centre for the global diamond trade, promoting its unparalleled financial, technological and intellectual infrastructure that services more buyers and sellers than anywhere else in the world. Through the AWDC Diamond Office, a government authorised body streamlining Antwerp's vast diamond import and export flow, and through its dedicated International Affairs Department, PR and Communication Services, AWDC endeavours to strengthen the image of diamonds and actively contribute to a transparent and ethical business environment within the worldwide diamond industry.

T: +32 2 238 97 11
F: +32 2 231 13 01
fdieryck@essenscia.be
www.essenscia.be

Belgian Federation for chemistry and Life Sciences Industries

Essenscia represents and brings together 800 companies in Belgium's chemical, plastics and life sciences industry. With turnover of 52 billion euros and 90,000 direct employees, the sector represents 1/5 of the entire Belgian manufacturing industry. The sector exports 80% of its production and generates a trade surplus of 25 billion euros, thus contributing to the vigour of the Belgian economy. The sector is also very innovative with nearly 2.43 billion euros R&D-expenditures every year.

Belgium is the number one chemical country in the world on a per capita basis and a dominant player of a wide range of key chemicals and plastics in Europe. The spectacular development of the port area of Antwerp since the 1960s has been of vital importance for the growth of the base chemical industry in Belgium. Thanks to considerable investments by Belgian and foreign companies in the petrochemical industry and other major chemical activities, Belgium has developed into a leading global petrochemical center.

Belgium is also a world leader in pharmaceuticals. Nearly 30,000 people work in this sector, which alone accounts for 10% of all Belgian exports. In fact, 40% of all private sector R&D- expenditures is in the pharmaceutical industry, twice the European average.

1000 Brussels
T: +32 2 515 08 11
F: +32 2 515 08 32
vc@vbo-feb.be
www.vbo-feb.be

The Federation of Enterprises in Belgium (FEB) is the only multi-sector employers' organisation representing companies in Belgium. FEB has 35 full members, all of which are professional, sectoral federations – in addition to its applicant and corresponding members. All in all, it represents more than 48,000 businesses, of which 41,000 are small or medium-sized firms. In terms of jobs, FEB represents approximately 75% of total private sector employment.

The main activities of the Federation of Enterprises in Belgium are:

- promoting and encouraging entrepreneurship;
- defining common positions of Belgian enterprises;
- ensuring representation in many national and international advisory and administrative committees and institutions;
- acting as an intermediary between enterprises and government, administration, trade unions, consumers, etc.;
- providing a flow of information to both members and the general public.

The Flemish Land Agency, a Flemish government agency, is responsible for the organisation and management of the open space in Flanders. Furthermore, it contributes to rural policy in Flanders. In its execution of the manure policy, the Agency strives to the improvement of water quality. The VLM seeks to create a sustainable open space where a high quality of life, work and recreation are important. On demand of its partners, the VLM places the knowledge and experience of its employees concerning land consolidation, land development and nature development, at disposal. The VLM has many years of experience in land exchange. The VLM cooperates with its partners through local land banks to propose measures for land exchanges and compensation. The VLM takes part in numerous European projects and develops international networks. The VLM actively guides the farmers, stimulating them to practice sustainable agriculture and monitoring a correct implementation of the manure legislation. By means of agro-environmental agreements, the VLM stimulates land users towards a sustainable management of open space. As the most intensive user and manager of open space, the farmer is one of the main partners of the VLM. The VLM supports farmers in their nature and landscape care, and simultaneously supports the towns and local communities.

The **Antwerp - Waasland Chamber of Commerce and Industry** is with its 3000 members the economical driver behind the Antwerp region. In Belgium the province of Antwerp accounts for a third of its exports. Many of the world's major telecommunications, chemical, building and pharmaceutical companies have a presence here. Combined with the port activity, which contains the second largest chemical cluster after Great Houston; the diamond Industry with 80 % of the world's production of rough and 50 % of polished and industrial diamonds traded in the city and the fashion centre, it is obvious why the Chamber plays such an important role on the Flemish, Belgian and world economic forum. The Chamber offers its members lobbying, networking activities and in-depth concrete business projects.

ABN AMRO Bank's International Diamond and Jewelry Group

ABN AMRO enjoys a long lasting tradition of active involvement in the global industry for diamonds and jewelry. The industry is serviced by a dedicated team of specialists: the International Diamond and Jewelry Group (ID&JG).

ID&JG is the global market leader in offering financial services to the diamond and jewelry industry, with an approximate 30% market share in financing the global industry's debt. With a strong focus on building and nurturing long term relationships and continuously adding value to the industry, our goal is to provide optimal service and partnership to our clients. Our strong and unique presence in the industry's key locations, like Antwerp, New York, Mumbai, Dubai, Hong Kong, Geneva and several more, provides unequalled local market knowledge on a global scale.

In addition, our client focus stretches beyond the diamond and jewelry industries, into related segments such as watches, luxury, and precious metals. ID&JG is uniquely positioned to provide its clients with commercial, investment and private banking solutions.

BMI-SBI is a semi-public investment company whose main objective is the medium to long term co-financing of foreign investments by Belgian companies. Its major shareholders are Belgian public institutions as well as private companies such as BNP Paribas Fortis, ING and Electrabel.

Our activities are oriented towards the financing of new subsidiaries of Belgian companies worldwide but also include acquisitions or the expansion of existing foreign subsidiaries. Since its establishment in 1971, BMI-SBI has supported more than 300 Belgian foreign investment projects in over 50 countries worldwide.

BMI-SBI mainly takes minority equity participations in foreign projects and/or provides quasi-equity financing such as long term subordinated loans. The average financing amount ranges between € 0.5 to 2.5 million while the term is usually between 5 to 10 years. For projects in emerging markets, also larger amounts are feasible, i.e. €10 to 15 million or more, and this via our European partners of the EDFI network.

BNP PARIBAS
FORTIS

BNP Paribas is one of the six strongest banks in the world according to Standard and Poor's and the largest bank in the eurozone by deposits. The Group has a presence in more than 80 countries and more than 200,000 employees, including 160,000 in Europe.

BNP Paribas Fortis offers the Belgian market a comprehensive package of financial services for private individuals, the self-employed, professionals, SMEs and public organisations. The bank also provides wealthy individuals, corporations and public and financial institutions with custom solutions for which it can draw on BNP Paribas' know-how and international network.

In North & East Asia, BNP Paribas is organized around the dynamic regional hub of Hong Kong with its business primarily comprising the two core areas of Corporate and Investment Banking & Investment Solutions. In China, BNP Paribas is present in Beijing, Shanghai, Guangzhou, Tianjin and Chengdu. On top of this, BNP Paribas Fortis offers its customers the benefit of **two Belgian desks**, one in Beijing and one in Shanghai, serving as dedicated entry-points for all daily banking needs.

ONDD, the Office National Du Ducroire | Nationale Delcrederedienst, is the Belgian public credit insurer with a mission to promote international economic relations. ONDD performs this task as an autonomous government institution enjoying a state guarantee.

ONDD insures companies and banks against political and commercial risks relating to international commercial transactions, for example regarding capital goods and industrial projects, and contracted works and services. For these risks, ONDD can also work alongside banks through risk sharing schemes. ONDD also insures against political risks relating to foreign direct investments and directly finances commercial transactions of limited proportion.

Liege Airport - The Flexport®

Liege Airport provides to the “cargo community” what it really expects: Flexibility, development opportunities, added value, cost reduction, personalised services & close partnership.

Liege Airport is Belgium's largest cargo airport and the 8th largest cargo airport in Europe. Liege Airport is fully focussing on cargo operations and specialised in live animals, flowers and fresh products (in 2010 a record number of 639,434 tons have been carried through it).

Very strategically located, right in-between all major European Markets and continuously available (H24 - 7/7 - No curfew - No slot- No congestion- High speed turnaround) Liege airport provides the fastest and most convenient infrastructure for the professionals of transport and logistics.”

Regarding passengers, it is the ambition of Liege Airport to become a gateway to Europe for Chinese visitors and businessmen, with dedicated services at the airport and direct connections by air, rail and road. Liege Airport is directly connected to the High Speed Train connecting Amsterdam, Paris and London.

www.portofzeebrugge.be

Zeebrugge, gateway to Europe.

Zeebrugge, the Belgian coastal port close to Rotterdam, is a modern and efficient port complex.

Market access, cost effective and dedicated are its major trump cards.

Zeebrugge has developed into a versatile port. The port not only focalises on European roll-on/roll-off traffics. Also intercontinental (container) traffics, container feeder traffics, conventional cargoes, liquefied natural gas, cruises and last but not least the traffic of new cars constitute core businesses.

In the automotive sector Zeebrugge even holds the pole position in the world.

Zeebrugge is a deepsea coastal port that handles the largest container carriers. Every week no less than 11 container liner services link up Zeebrugge with the Chinese markets.

The wide range of intra-European and intercontinental services and the excellent hinterland connections turn Zeebrugge into the exquisite place for companies to organise their European or worldwide distribution.

Antwerp: a reliable partner in your supply chain

The Port of Antwerp is the gateway to Europe, through which almost 190 million tonnes of cargo flow every year. Antwerp is the second largest port in Europe for international maritime traffic and strategically located in the heart of Europe with the fastest, most efficient connections to the major industrial and consumer centers of Europe.

Antwerp's central location within North-West Europe makes it a preferred choice for European distribution centers. Thanks to its enormous storage capacity (over 545 ha covered warehouses), the port acts as the supermarket of Europe where all types of products can obtain the specialised and customised handling and storage they require.

Being the second largest container port of Europe, Antwerp does not only specialise in containers alone, but the emphasis is also on general cargo such as steel, fruit, forest products, cars, foodstuffs and project cargo. Moreover, Antwerp is the largest petrochemical cluster in Europe.

The Port of Antwerp is in permanent operation 24 hours a day, 365 days a year. Proof that every customer's goods are in safe hands.

Port of Ghent (Belgium): large enough to cope, small enough to care

Ghent is a congestion-free logistics and industrial seaport, home to global leaders in dry and liquid bulk, automotive and distribution. Typical commodities are steel, coal, ores, agro, fertilisers, construction, forest products, chemical and bio energy industries (300 companies, representing 70,000 direct and indirect jobs).

Traffic volume: 48 million tonnes of cargo by water in 2010; nautical access: Panamax type vessels of 92,000 DWT; quay length: 27.5 km.

Ghent port offers a choice of well-equipped terminals and warehousing facilities for all commodities in bulk, breakbulk and containers and has excellent hinterland connections by water, rail and road. It is the strategic distribution and logistics hub for Belgium, France, the Netherlands and Germany by inland waterways, road, rail and pipeline and for Norway, Sweden, Finland, the Baltic, Russia, Greece, Turkey, Libya, Tunisia, Egypt and Morocco by short sea shipping.

Ghent port has 660 hectares of industrial greenfield sites readily available for warehousing and industrial developments near the new Kluizendok (4.5 km of quays).

With this mission, we aim to establish strategic relationships with ports, shipping lines (container & conventional), logistics companies and the industry.

F: +32 2 753 41 59
info@brusselsairport.be
www.brusselsairport.be

Brussels is the Capital of Europe; it is both politically and economically at the heart of Europe.

In 2010 **Brussels Airport** welcomed 17 million passengers. Over 100 airlines operate from the 3 non-congested runways, generating 220,000 movements per year. More than 750,000 tonnes of flown and trucked cargo passed through Brussels Airport last year. Brussels Airport has a dedicated cargo area called Brucargo, grouping all stakeholders in one free trade area: handling companies, customs, trucking companies, forwarders.

Nine out of ten passengers are O&D, highlighting the strength of the Brussels Airport catchment. With almost ten million people living within one hour's drive and 20 million within one and a half hour, the airport has a wide catchment area incorporating the south of the Netherlands and the north-eastern part of France.

One of the major benefits of Brussels Airport is the broad profile of the Brussels Airport passengers, underpinned by strong business travel from political institutions such as the EU and NATO, and major multinationals based in and around the city. The large expatriate community also provides a significant leisure and VFR market. It is for this reason that our motto at Brussels Airport is "Welcome to Europe".

Quality in education and research are central to the University of Antwerp's mission. Antwerp is the third largest university in Flanders, with around 15000 full time students and almost 4000 staff members. It's a medium sized, fully accredited and publicly funded university, located in the economic, cultural and historic heart of Belgium. Antwerp is a research intensive university with over 1100 PhD students in humanities, life sciences and natural sciences. 12% of students are international. The **University of Antwerp** is ranked 179 in the QS World University Rankings 2010, and 203 in the Times Higher Education World University Ranking 2010. Areas with the most notable internationally recognised research activity include the following.

In the humanities there is strong research on Social-Economic Policy and Organization. The city is the inspiration for studies in Urban History and Contemporary Urban Policy. There is a natural focus on research related to the Harbor, Transport and Logistics. In the life sciences there are centres of excellence in Neurosciences, Drug Discovery and Development, Infectious Diseases and Vaccines, as well as Imaging. In the natural sciences, Antwerp is at the global forefront for research in Materials Characterisation, as well as in studies in Ecology and Sustainable Development. In these areas Antwerp has received major grants from the European Research Council.

The **ULB**, with its 11 Faculties and two Schools and Institutes, is not just multicultural but also a comprehensive university covering all disciplines and all study cycles.

With three Nobel Prizes, one Fields Medal, one Abel Prize, three Wolf Prizes, seven European Research Council grants, two Marie Curie Awards and many major national prizes, the ULB is also a major research university of worldwide standing in the academic community.

It meets up its social, societal and scientific responsibilities with great commitment, combining broad access to higher education with high level research, and through its role in furthering economic development in the regions where it is located (Brussels and Wallonia). The ULB also has a teaching hospital (the Erasme Hospital), a cancer institute (the Bordet Institute), and an extensive hospital network.

For about a decade now the university has been actively involved in maximising research potential in both Brussels and Charleroi, where it has set up a biotechnology pole around its renowned Institute for Biology and Molecular Medicine (IBMM) & Institute of Medical Immunology (IMI).

Founded on the principle of free-thinking, which advocates independent reasoning and the rejection of dogma in all its forms, the ULB has remained true to its original ideals – an institution free from any form of control which is committed to defending democratic humanist values.

A university offering a full spectrum of disciplines and excellence in research

Ulg - a 193-year-old university- is a French speaking university in Europe with 9 Faculties, 1 Management School and 1 Institute for social sciences, spread over 4 campuses. All faculties offer educational programmes at bachelor and master level in all areas of knowledge, as well as research programmes. It is fully integrated in the Bologna process and applies the best European standards for High Education. The teaching offered to its 20,000 students -23% of whom come from foreign countries- is well adapted to a changing world and expectations of the modern job market.

An innovator in terms of techniques as well as engineering, the university has strong expertise in a variety of fields, including environmental studies, life sciences, biotechnologies, Earth sciences, space studies, entrepreneurship, logistics, etc.

More than half the university budget is devoted to research projects. Excellence is a must. Interdisciplinary and internationalisation are keywords in the research units. Ulg signed in 2005 the European Charter and Code and has been awarded the EU label HR Excellence in Research.

The ULg brings together education, research and professional training, and has helped launch spinoff companies in many fields, making it a driving force of the area's economy.

excellence in hot water

ACV began on its course of continuous growth and astute investment in R&D in 1922 in Brussels. Steady progress was made in products that were reliable and highly respected in the heating and ventilation business. Over time ACV focused on the design and manufacture of superior quality boilers for heating and hot water tanks. By investing in innovation and adopting a no-compromise approach to product design, such as its commitment to stainless steel for its Tank-in-Tank concept for hot water cylinders and for its fire tube heat exchangers for boilers, ACV expanded into the highly competitive global market. With its own subsidiaries in some 15 countries and other representations across three continents, ACV is well positioned to serve demanding customers in the residential (homes) and commercial (hospitals, hotels, fitness centers etc.) sectors with high performance hot water and heating systems at the highest levels of efficiency. We provide technical support and after-sales service to design and maintain best-for-purpose hot water and heating installations. With our focus on adaptable, multi-energy tanks, we produce a key component for solar, heat pumps and other renewable energy solutions.

A-Law Attorneys is a Belgian law firm providing both national and international legal services.

Internationally, we are a founding member of Eurennet (European Recovery Network), a European network primarily focused on recovery within Europe. The firm has several liaison offices worldwide, facilitating the exchange of lawyers and thus legal knowledge. A-Law is therefore well placed to offer a range of integrated legal services to organisations engaged in international trade and international investments.

In addition to the Belgian team of lawyers, each with their own knowledge, the office is host to a team of foreign lawyers, testimony to the firm's innovative approach. Currently the foreign lawyers are from China, Russia, Poland, Bulgaria, Romania, Colombia, Turkey, Morocco, France, South-Africa, Brazil and more are to follow.

A-Law's customers include both multinationals and SME's active across all economical sectors ranging from logistics and auxiliary services (all modes of transport), machinery and equipment, chemicals, petrochemicals, pharmaceuticals, agriculture, food and beverages, textiles, hygiene, design, IT services, etc. as well as global risk insurers and brokers.

A-Law is described as "a full service firm" by Legal 500, the legal practice reference guide.

With more than 20 years experience in the industry, we can truthfully say we are more than specialised in shaving floors. After many hours of research and considering the expectations of our clients, our equipment has been designed in-house by our team of experts, technicians and engineers.

The main activity of **Alphaplan** is the ultraflat grinding of industrial warehouse floors with very narrow aisles and all the side-activities for the treatment of industrial floors. For this purpose we developed the Qplane (1 patent), the FloorShaver (2 patents pending), the FloorProfiler (1 patent pending) and the FloorBridge.

contact@altissia.com
www.altissia.com

ALTISSIA INTERNATIONAL is an established provider of fully flexible and innovative language learning solutions. The company is based in Belgium, on the university campus of Louvain-la-Neuve. It was set up by a group of experienced language experts, active for more than 25 years in the academic world and in company training courses. ALTISSIA®'s learning platform (www.altissia.com) is a state-of-the-art tool that requires no software installation for immediate use in a corporate environment. Students can learn anytime, anywhere, all they need is a web browser. With ALTISSIA®, you can learn up to 5 languages in real-life situations: French, English, Dutch, German and Spanish. The dynamic and interactive method behind ALTISSIA® is based on two key learning principles:

- **Immersion:** language skills are developed and consolidated through intensive exposure to real life multimedia animations recorded exclusively by native speakers. Students practice the target language in various business contexts anchored in real situations.
- **Spiral learning:** every subject is introduced progressively, reviewed on several occasions and referred to throughout the course. By using this method, students, going at their own pace, learn how to understand native speakers, how to improve their pronunciation and how to assimilate the vocabulary and grammar of the target language.

eric.verhulst@altreonic.com
www.altreonic.com

Altreonic is a technology provider in the domain of high reliability and safety critical embedded products. Its activities cover integrated tools for development, requirements capturing, visual modelling and simulation, a unique formally developed network-centric Real-Time Operating System and scalable, fault tolerant capable hardware controllers.

Products: Using a formalised approach, Altreonic supports his customers with the GödelWorks web-based project support environment and the unique OpenComRTOS Designer programming environment. While most of the code is generated from the graphical environment, OpenComRTOS was developed using formal techniques and has unique features such as inherent safety support, scalability and supporting heterogeneous targets in a transparent way. In line with the formalised methodology, the applications can be generated for the StarFish controllers, capable of fault tolerant control.

Application domains: low power devices, aerospace/defence, smart control and high performance processing.

Licensing: Altreonic's technology and products are available in a low cost binary as well as an Open Technology License.

Antwerp Headquarters

Successful companies are constantly looking for opportunities. Antwerp Headquarters will help find them! Are you considering doing business in Europe? Antwerp Headquarters is your one-stop-shop for information, advice and guidance. Professional, objective, tailor made, confidential and free of charge!

Antwerp Headquarters is a joint venture between the public and private sectors: the city of Antwerp, the Antwerp Chamber of Commerce and Industry and 23 private companies. We are committed to bringing new business to Antwerp. All partners share the same dynamic vision for further expanding Antwerp's economic engine. With this clear focus strategy, the agency promotes Antwerp's potential for different types of companies in various sectors. In addition to its well established economical assets (its port, diamonds, fashion and chemical industry), Antwerp holds many opportunities for companies in new markets (e.g. nano-technology, new media, pharmaceuticals, ...) Companies from a wide variety of sectors will find in Antwerp the keys to implementing a sound strategy and expanding business.

What exactly can Antwerp Headquarters do for you? We receive first hand information from the local government on many issues critical to investors: establishment formalities, expat service, work permits, office locations, etc. Thanks to our close ties with the business community, we can introduce you to potential business partners, suppliers and/or customers, help you integrate in the business and expat communities and much more.

AppliTek

Since 1985 **AppliTek** has become an established manufacturer of automatic measuring equipment, “on-line analysers” applied to environmental compliance, to water treatment and industrial process applications. The company aims to provide superior value, best available technology, technical support as well as global availability to its customers. From a general perspective, AppliTek’s specialised analytical solutions have influence on food, water and energy procurement, resources of our society, and are contributing indirectly to the establishment of a safe, clean living environment for this generation and those yet to come. With AppliTek, the complete **water cycle** can be monitored and assessed, from river water quality to drinking water production and distribution, and waste water treatment works. **Quality control & quality assurance** is significantly enhanced in manufacturing sites, from car manufacturing to food & beverage factories. New standards have been set in **process control** of the chemical / base chemical / petrochemical industries, by optimising production and even protecting from production incidents. Even the mining industry can benefit from AppliTek’s know-how in non-destructive **portable analysis** for screening or measuring purposes. In the framework of AppliTek’s global strategy, the Belgian company is proud to have been allowed to become a member of the Flanders-China Environment and Energy Cluster (FCEC), an entity supporting and sustaining AppliTek’s presence in the environmental market in China. Last but not least, early spring 2011 AppliTek inaugurated its first China office in Beijing, with more offices planned in mainland China for local advice and support.

www.baetenvinopolis.be

We are wholesalers, selling wines in bottles and barrels of 20-30L.

We are exclusive in Benelux for a wine dispenser-cooler. The wine is delivered in 1-way barrels and is pumped by pumps to the dispenser, better wines and less handling, very comfortable for the restaurants.

We started already in Wenzhou province of Zhejiang. The wines we bring (in barrels but also in bottles) are from good medium appellation so as "vin de pays" and "appellation controlee" from South of France.

We bring the dispenser for cooling white and rosé wine. The wines keep always fresh and fruity and don't oxidate during the dispensing period. A product that invites to consume.

BAT.architectuur

The teams of **BAT.architectuur** are composed of excellent professionals that have performed successfully in Europe, North Africa and Asia. We combine experience in a variety of fields and have the set-up and know-how that allows for the imagination and implementation of creative spacial solutions for the most challenging sites and briefs. We have dealt with publications, landscapes, public buildings, dwellings, offices and urban space. BAT.architectuur is equally at home at the large and the small scale, moreover this multi-angle perspective brings strategic insight to our buildings and tactical cunning to our urban projects. Each project is elaborated as a research into optimal solutions for the specific programmatic and contextual questions. A most noteworthy quality of our design approach is its clear embedment in building practice and construction management. Our projects are therefore never standard products, but rather well investigated proposals for a specific design problem and a particular context. With continuing involvement in teaching, research, practice and architectural debate, the reference frame of BAT.architectuur is firmly international and it is our aim to stand with the best of contemporary practice.

Belvas is a “hand-made” chocolate factory located in the South of Belgium since 1987.

In 2005, Thierry Noesen bought back the company. This perfectionist and idealistic expert in cocoa thinks “organic” but also “fair trade”. His challenge: to prove to the worldwide that the fair trade products, are as well good for the taste as they are on the human plan, for the small producers.

And even up-market. Over the years, Belvas has made many investments in energy saving processes and has become the first chocolate factory of the North of Europe by obtaining the European certification EMAS (Eco Management and Audit Scheme) in 2011.

T: +32 14 45 33 11
F: +32 14 45 33 88
corsendonk@corsendonk.com
www.corsendonk.com

Brewery Keersmaekers was founded in 1906 by Mr. Antonius Keersmaekers in the city of Oud-Turnhout (Belgium), a village located in the Belgian province of Antwerp. In the beginning, Brewery Keersmaekers was brewing its own "Paters"beer, along with bottling several soft drinks. During the following years, the distribution activity became more and more important.

In 1982, the name of the company changed to **Brewery Corsendonk-Distribution**. Also, the company Corsendonk was established in these years with the focus on export.

The company is still family owned for the fifth generation.

Starting in 1982, "Corsendonk bier" became a famous brand of beer in Belgium and many other countries, thanks to a good distribution organisation, a motivated team and the brand "Belgium" as a famous beer country.

With an annual turnover of 42 million Euro and 80 employees, Brewery Corsendonk-Distribution is the second largest beer wholesaler in Belgium.

F: +32 16 47 99 85
info@bwp.be
www.bwp.be

BWP is the studbook of the Belgian Warmblood Horses. The first BWP breeders had to start from scratch, there was no tradition of raising a typical warmblood riding horse and perhaps herein lies the key to the success of the studbook. Far over boundaries, BWP breeders went looking for the best genes aiming to achieve a superior quality sports' horse. Those clever mixtures from most important renowned European blood currents have been for many years the warranty of very high level sports' horses. Since the World Breeding Federation for Sports' Horses is in activity, the BWP has always been amongst top rankings.

In 2007, BWP's history came to a peak when DARCO reached the 1st place top ranking. Now, he's already for four years, the best stallion of the world. The World Equestrian Games of 2010 in Kentucky became a peak moment. The success of the Belgian delegation, with a bronze medal in team jumping, was worldwide recognised. Also the individual world champion made the studbook proud. Belgian rider Philippe Le Jeune won the golden medal with BWP Vigo d'Arsouilles (Nabab de Reves). BWP horses are at the highest level. To perform well in horse riding, as well on national as on the international scene, the BWP horses fit best.

The Troydo Quarry Belgian Blue Limestone

Since the 1930s, high quality of Bluestone, referred to locally as "Petit Granit - Pierre Bleue de Belgique" have been extracted from the quarry located at the place named Troydo in Ouffet (Belgium).

The deposit is quarried over an area of several acres and contains considerable reserves. The exploitable thickness of seamless layers of the deposit is roughly 30 meters.

Quarrying management and equipment have recently been adapted to new technologies. Nowadays, the blocks are extracted by diamond sawing and shaped using hydraulic trimmer or block squaring saws. They are shaped like parallelepipeds and their average weight varies between 5 to 15 tons.

Heavy quarry equipments are used for raising the blocks and cutting blocks into slabs. The production of blocks reaches 3.000 m³ and 8 persons are employed.

Cross-cultural writing for global thinkers

CompanyWriters is a company specialising in written communication services for small, medium and large businesses. At its heart is a highly-qualified, skilled and cosmopolitan team dedicated to providing tailor-made services ranging from copywriting to the translation and correction of professional texts. CompanyWriters' systematic approach, of listening to and empathising with clients, while maintaining analysis and rigour throughout the process, guarantees the best possible visibility for companies in their existing or potential markets worldwide.

Established in October 2006, CompanyWriters is now 5 years old. "More than a hundred companies in the Meuse-Rhine Euregio, in Belgium and throughout Europe have entrusted their business to us, including different sectors such as transport and logistics, health and pharmaceuticals, hospitality and food services, construction, energy, sustainable development, information, marketing, luxury goods and university education," explains Bernadette Pâques, Managing Director.

A finalist in the *Grand Prix Wallon à l'Entreprenariat* (Walloon Award for Business), Bernadette Pâques won the 2010 Equiwoman Award, a prize awarded by Minister Sabine Laruelle to recognise a businesswoman who develops her company while at the same time caring for her family. She also runs the Association of Women Entrepreneurs in Belgium for the province of Liège and is interest group leader for language-based activities with the *Cercle de Wallonie*.

management@stevenpiano.com
www.stevenpiano.com

D&M International is the management of the Belgian concert pianist Steven Vanhauwaert. During our trade mission to China we would like to find Chinese organisers of classical music concerts who would like to organise a solo piano tour of Steven Vanhauwaert through the famous concert halls in China. We would also like to find sponsoring companies (Belgian and Chinese) to help with the financing of this tour in China. The tour would become part of Mr. Vanhauwaert's broader Asian tour. This project is also part of a more extensive effort to promote Belgian culture in Asia, and to stimulate a cultural exchange project between Belgium and the participating nations.

Dakota is specialised in the manufacturing of thermoplastic & thermosetting powder adhesives for lamination and binding of textile materials. We supply our products to different industries including carpet industry, interlining, technical textile, shoe industry, automotive industry and all kinds of technical textiles related industries.

As such, Dakota's powder adhesives are being widely used by automotive tier 1 suppliers. The main application is binding and lamination of fibre felts that are used as sound insulation materials, or that are thermoformed into engine insulation & car interior trim parts. New application areas that are currently being developed are the lamination of lightweight PU headliners and sunroofs.

We have commercialised front-end and back office software specifically targeted at GSM operators, large retail chains, national and local distributors to provide them with a logistical and financial platform for their operations. This includes management of e-tickets (vouchers) to points of sale, cash registries and other distribution points. Our soft and hardware securely manages all aspects of delivering electronic vouchers to 1000's of point of sale. This includes payment tracking for points of sale, credit/debit of salesmen on the field, trace transactions within chains and many other options.

Additionally we have created a gift card solution for large retail organisations. This issuing and acquiring software manages and operates every aspect of dealing with gift cards from ordering cards from the manufacturer, payment , activation and transaction tracking.

We have also recently obtained license to operate money transfers and have designed specific software that meets the highest standard to fully operate and manage money transfer business on small and large scale.

Incorporated in 1997, **De Witte-Viselé Associates** provides services with respect to chartered accountancy, consolidation and taxation.

Thanks to our know-how, we are able to assist managers and executives of regional, national as well as multinational companies active in a broad range of industries, with advice and practical implementations. In certain areas, we have developed specialised expertise, both in accounting and taxation. Our specialisations include consolidation, financial reporting (including US GAAP, IFRS), transfer pricing, indirect taxation (including VAT and customs), intellectual property right (IPR) tax planning, film financing (including tax shelter regime for audiovisual works) and optimisation of immovable property taxation on equipment and machinery.

Whether it concerns a one-time advice or a recurring mission, thanks to the professionalism of our partners and staff, we listen to our clients' concerns and focus on an open and efficient dialogue to provide with the highest possible return to our clients. In our work, we apply a pragmatic, "no-nonsense" approach. Thanks to our flexible internal structure, we are able as no other to combine professionalism, availability and flexibility.

s.drogart@deltacast.tv
www.deltacast.tv

DELTACAST is dedicated to the next generation of virtual graphics for live sporting events. The company's products rely on a set of proprietary high-technology modules: sensor-free tracking, image processing algorithms, adaptive chromakeying, and a high-quality 3-D engine. The existing products, designed for football, are DELTA-sport, DELTA-highlight, DELTA-stat and DELTA-advertising.

- DELTA-sport delivers virtual graphic overlays including offside lines, distance and speed measurements, animated 3-D logos, scores, magnifiers, and player trajectories.
- DELTA-highlight is an analysis product based on the DELTA-sport tracking technology. It provides a large range of virtual graphics: player trajectories, player highlights, arrows, circles, speeds, distances, and all the other elements ensuring an efficient and demonstrative in-depth analysis of football sequences.
- DELTA-stat is a completely original and inexpensive solution for customised live sports branding. It automates the appearance of timers, stats, animations, scores, rankings, and more, without requiring any software or graphics expertise from the user.
- DELTA-advertising overlays animated virtual banners besides the goals, 3D objects (animated items, flags, jumbos...) but also a second Virtual Row Boarding of LED.

DELTACAST is also developing state-of-the-art products for the professional TV broadcast market: TV Game Software, Virtual Director and TV show Automation.

dewit@dewitlawoffice.be
www.dewitlawoffice.be

Established in 1945, **Dewit Law Office** has always maintained a close relationship with its clients. A team of thirteen lawyers and four secretaries, supported by a small group of additional external staff, process a number of cases dealing with a variety of issues from all domestic judicial districts. DLO has permanent correspondents based in East-Asia and a network of correspondents throughout the European Union.

Bernard Dewit's interest in China and 27 yearlong involvement in Chinese business, have helped him to gain the necessary experience to both understand and facilitate Chinese investments in Europe and vice versa. Having forged close ties with Chinese law firms in Beijing, Shanghai, Chengdu and Hong Kong, Dewit Law Office is the first Belgian law firm to have obtained a license to open a Representative Office in Beijing, with a branch in Chengdu to cover Western China.

Thanks to our presence in both the heart of Europe and in the heart of China, we are able to provide 24 hour, round-the-clock support to our clients. The main strength of Dewit Law Office is its line-up of multilingual, multicultural and multidisciplinary team members. Cases can be processed in French, Dutch, English and Chinese.

Our trading relationships are just as valuable as the diamonds we handle. When we sold our first parcel of diamonds almost a century ago, we had one simple belief. That to grow as a company, you have to build relationships of trust with both suppliers and customers. For our customers that means delivering reliable assortments. And for our suppliers it means maintaining a continuity of demand. Ultimately it is reliability and integrity that adds value and enables people to work with us effectively. We believe that as the market changes these old fashioned values will remain as important as ever.

The diamond business never stands still. There are always new opportunities and people interested in developing new ideas. You could be one of them. Perhaps you are thinking about starting a new manufacturing project, or forging a new alliance. If you are, and think you may be able to benefit from our experience, call us on +3232329032.

DIAMOND TRADING NV

Antwerp is the prime centre for the wholesale trade in rough diamonds, positioned between producers and the broader diamond industry. The offices of **Diamond Trading** are situated in the heart of Antwerp's diamond area. The long-term relationship between Diamond Trading and its customers is based on trust, mutual understanding and the sharing of reliable information. Diamond Trading has a customer base in all major cutting centres. Clients rely on specially assorted and regularly supplied rough diamond parcels.

This, together with the accumulated experience, gives Diamond Trading an edge in optimising the value of run of mine productions. Diamond Trading sells rough diamonds from Russia, RDC, Canada, Angola, Lesotho and other origins. Diamond Trading deals in a large variety of diamonds covering all shapes, sizes, colours, clarities and prices. The company purchase diamonds from well-established suppliers strictly following the rules of the Kimberley process. Diamond Trading have privileged long term relations with some mining majors.

info@ecover.com
www.ecover.com

Ecover is one of the world's leading manufacturers of highly efficient and supremely ecological washing and cleaning products. Founded in Belgium in 1980, Ecover has always been at the forefront of its industry - it marketed a phosphate-free washing powder even before phosphates were branded as a problem. Ecover operates from its world-famous ecological factories in Belgium and France. The company's guidelines for environmental criteria, the selection of ingredients and manufacturing processes are far stricter than those required by EU legislation. Ecover has been recognised by the United Nations Environment programme (UNEP) for their outstanding practical achievements for the protection and improvement of our environment. The company has offices in Belgium, USA, UK, Germany, France and Switzerland and its products are marketed in more than 30 countries worldwide. Ecover only uses sustainable plant-based and mineral ingredients. All ingredients are chosen to ensure Ecover's products are as effective as possible whilst also achieving the lowest possible toxicity and the most rapid and complete biodegradability.

ESIA

Avenue Molière 298
1180 Brussels
T: +32 2 215 15 50
F: +32 2 248 02 40
jmhounsou@esiatrading.eu

Belgium is known for its delicious desserts and sweets, chocolates and waffles. "Belgian chocolate", "Belgian Waffles". These typical Belgian products are developed according to traditional recipes and using the finest ingredients.

ESIA officiates as Export Department of Belgian Food Manufactories. Those factories prefer to concentrate on the production and development of new products and delegate to Esia the export of their products in Asia.

On the other side, ESIA is acting as sourcing partner for Chinese companies wishing to import Traditional European Food products.

Esia offers additional services: custom clearance, quality control, air and ocean transport as well as marketing support.

By its multiple location in Asia and Belgium and its knowledge of legal, commercial, technical and sanitary local laws and regulations, ESIA allows smooth and fruitful relations between the Belgian producer and the Chinese importer or distributor.

Export of European (Belgian)-made cosmetics (i.e. Skin Care products, Make Up, Toiletries)

Supply of a full line of high-quality skin care products with famous Belgian brand name "Istrilène".

During more than 20 years our company has successfully supplied products to Asian markets.

Our skin care products are adapted to the Chinese skin types.

In addition to the supply of skin care products, we also offer assistance and training in beauty consulting and in skin care procedures.

All our products are developed and manufactured according to the highest standards of quality and safety.

Our company has an established business cooperation with an experienced importing and distributing company for cosmetics in China, i.e. "3W Trading Co." in Guangzhou.

In cooperation with the Chinese importing company we have already established a successful distribution of "Istrilène" cosmetics in various 'high-end' chains of Beauty Salons in some provinces of China.

We still wish to expand distribution of our products to other provinces.

T: +32 10 86 64 25
F: +32 10 84 07 67
roger.assaker@e-xstream.com
www.e-xstream.com

e-Xstream engineering is a software and engineering services company, 100% focused on advanced material modeling. e-Xstream develops and commercialises DIGIMAT suite of software, a state of the art multi-scale material modeling technology that fasten the development of optimal composite materials and parts for material suppliers and end users across the automotive, aerospace, consumer goods and industrial equipments,... industries. DIGIMAT; The nonlinear multi-scale materials & structures modeling platform, is an efficient predictive tool that helps our customers designing and manufacturing innovative and optimal composite materials and parts time and costs efficiently. DIGIMAT is used by CAE engineers, materials scientists, chemists, specialists in manufacturing processes of composite materials to accurately predict the nonlinear micromechanical behavior of complex multi-phase composites materials and structures (PMC, RMC, MMC, nanocomposites...).

e-Xstream provides its customers with a complete and optimal modeling solution that suits their specific needs and integrates their existing design processes; from the compounding of the raw material (e.g. engineering plastics, rubber, CFRP, etc.) to the processing (e.g. injection molding) and application in the final product. With 3 offices worldwide (Europe and USA), a global channel partners network and a continuously growing number of customers in Europe, USA and Asia, we have added to our deep expertise in numerical simulation the business understanding of a large variety of materials such as reinforced plastics, rubber, hard metals and honeycomb sandwich panels.

FBGS International aims to become, through his unique Draw Tower Technology, his R&D capabilities and application know-how, the absolute World- Wide market leader in high quality low cost Fiber Bragg Gratings (FBG's).*

*Note: Fiber Bragg Gratings are components of many Fiber Optic (F.O) sensing systems.

FBGS International is a high-tech company that was founded in 2010 through the integration of FBGS Technologies and the take-over of selected assets of the company FOS&S. The company has a sensor production facility based in Germany and is also linked to an highly reputed international research center (IPHT / Jena Germany) that provides a continuous stream of R&D. FBGS International is specialised in the development, production and commercialisation of Fiber Optic Sensors and Sensing systems based on the FBG technology. This new technology and the related sensors are allowing to measure and monitor different parameters such as Temperature, Pressure, Strain forces etc. based on the reflectivity of light and will gradually replace the conventional measurements based on electricity. The company already has built a huge track record in infrastructure – civil engineering, the tunnel and mining industry, aerospace, geotechnical infrastructure, medical devices, energy and the oil and gas industry.

FEED | FOOD | HEALTH

Tienen's Feed Food Health Valley constitutes a knowledge and innovation community focused on groundbreaking initiatives, advancements and activities in the broad domain of healthy food and feed. For Chinese companies, active in the broad domain of Feed Food Health (including agro food, feed, functional nutrition, organic produce and machinery) the valley will be the gateway to the food industry in Europe. Since its creation the region of Tienen dual wishes to position itself even more effectively as a region in the heart of Europe with links to international networks through universities, laboratories and businesses, with outstanding infrastructure and with major pull as attractive place to live. The campus is located nearby the national air-port. The airport is not only the gateway to Europe; it is also a major economic player in itself. It is a major contributor to the logistics activities in Belgium and a key logistical player in Europe. Knowledge is another major strength of the Tienen region due to the presence of one of the leading universities in the world in Leuven and in the vicinity of the University of Brussels

info@fischlerdiamonds.asia
www.fischlerdiamonds.be

Fischler Diamonds was founded in 1952 by Bram Fischler and cousins, Aby and Cappi Fischler in Antwerp, Belgium and quickly grew into a leading international diamond manufacturing firm. In 1980, a United States office was established in New York City. In June 2011, we opened Fischler Diamonds Asia in Hong Kong. For more than 50 years and three generations, Fischler Diamonds is one of the most trusted manufacturer and diamond source in the industry. Our involvement in the diamond industry is a tradition in our family. Mr. Maurice Fischler (Bram's eldest son) is since May 2011 the President of the Antwerp Diamond Bourse, Mr. Stephane Fischler is vice president of the AWDC, treasurer of the IDMA and chairman of the IDC. At Fischler Diamonds "quality" is a second nature habit. The constant quality of our goods is only surpassed by the quality of our service. Taking time to listen to our customer's needs is the first step to our quality service. We aim to achieve a degree of excellence at every level of our organization. The finest quality is requested from the workforce in our factories to the staff in our offices. "We will share our passion for diamonds through providing the highest level of ethical conduct and service based on a long standing reputation for honesty and professionalism." Our Family name is our Company name, when buying from Fischler Diamonds you will buy into tradition knowing that "Our name is your guarantee". Combining tradition with youth and enthusiasm globally, Fischler Diamonds can cater to your every need.

FLANDERS' DRIVE

Oude Diestersebaan 133
3920 Lommel
T: +32 11 79 05 75
F: +32 11 79 05 91
info@flandersdrive.be
www.flandersdrive.be

Flanders' DRIVE is the research and competence centre for the Flemish vehicle industry. It has a clear focus on innovation in products and (manufacturing) processes. The activities are complementary to those of the individual companies and support them. The vehicle industry is inclusive trucks, busses and industrial vehicles and the suppliers. Since 2008 Flanders' DRIVE has evolved from an innovation platform to a knowledge centre with a clear international focus. Flanders' DRIVE can cover the complete innovation cycle from basic research to prototype development. The research is focused on four different research domains, i.e. Clean Powertrains (including Li-ion battery systems), Lightweight Materials (including joining methodologies), Cooperative Systems (e.g. V2V and V2I communication) and Manufacturing Systems. Flanders' DRIVE thus supports the drive towards E-mobility solutions.

Flanders' DRIVE is actively involved in the development of the "vehicle of the future" and is an important research participant in the living lab in Flanders which aims to speed-up the introduction of electric/hybrid vehicles.

www.horsten.be

HORSTEN International is assisting European companies, in particular SME, in doing business in China. Apart from being a specialised consulting company, HORSTEN is also involved in trading and investments. Today the company employs a dozen skilled consultants in its offices in Belgium, Hong Kong and China. HORSTEN International bridges the gap between a company's ambition to do business in and with China on one side, and its lack of resources on the other side. Tailor-made solutions are designed to overcome any difficulties that a company may face when initiating or improving its activities directed towards or located in the Chinese market.

HORSTEN International often enters into a partnership with its customers, focusing on value creation. This objective is achieved through HORSTEN International's unique business concept integrating consulting, incubating, and investment activities. Rather than merely assuming an advisory role, HORSTEN International pro-actively assists its clients in achieving their objectives for the Chinese market, and often co-invests in promising businesses. This process is captured in the company's methodology, whereby success of a project is built up step-by-step, from inception of a first idea throughout the implementation and follow-up of the customer's China venture.

Libinvest was founded in 1987 by Jean Michel Libert, a cosmetics creator. For over twenty years, the company has been investing in women's and men's beauty capital. All products have been approved by the Belgian Health Ministry and by the FDA (US Food and Drugs Administration).

Moreover, in order to guarantee the top notch quality of the formulas, Libinvest's laboratory scrupulously tests and analyses each batch of production. The R&D department is the added value of the company. Each year, 9% of the annual turnover is dedicated to the creation and optimisation of specific formulas for professionals and the general public.

Libinvest proposes the following registered trademarks:

- **Ophyto**[®], a phyto-energetic range:
A holistic care for your scalp, face and body.
- **2B Bio Beauty**[®], cosmeceutical products:
Your anti-age, bleaching... care thanks to 2B Bio-Peeling.
- **Minceur 2011**[®], a natural method with essential oils:
Your slimming care.
- The «**Beauty Partner - l'Institut de beauté**»[®] franchise:
Our expertise at your service.

Situated in the heart of the Antwerp diamond district, our company specialises in "excellent make", ideal cut diamonds. Our expertise lies specially in the "Hearts & Arrows" diamond cut, which displays a pattern of eight perfect hearts and arrows in a diamond. Using only the most experienced craftsmen in Antwerp and China, we manufacture our own line of fine round diamonds from 8 pointers up to 5 carats. Every diamond is carefully checked at each stage of the manufacturing process, giving the finished product the cut, clarity and brilliance you would expect to find in top quality gems.

Our diamonds are hand cut to perfection for ideal proportions and perfect symmetry. They have reached international acclaim and have been exported across Europe, the Middle East, the United States and South-East Asia.

Do you remember the waffles you could taste at the Belgian Pavilion during last International Shanghai Exhibition? Those were **Milcamps** waffles.

Created in 1932, Milcamps SA is a bakery company specialised in the production of Traditional Belgian waffles.

Our factory is located in Brussels and offers a wide range of traditional waffles produced according to regional recipes: Liege baked waffles, Brussels waffles, Namur galettes, Furnes baked waffles, waffles filled with fruits.

The respect for tradition is combined with the use of high performance industrial tools that allow us to respond to our customers' demands.

Milcamps distributes fresh and frozen products under Milcamps/Jacquet brand or the customers' own brand. We sell our products to the major retailers and the foodservice companies in Europe, USA and Asia where we act since 1996.

Milcamps is a subsidiary of Jacquet, one of the largest French industrial bakeries, a unit of Limagrain Holding SA.

Our factory is certified BRC level "A" and IFS "higher level".

COME AND JOIN THE APES - **Mixed Ape**, is a "Ready to enjoy" real cocktail. It is the unofficial *king of the Jungle* in the "Ready to drink" market with millions of bottles already sold and enjoyed across Europe. It has now landed on this side of the channel with a bold new mission to help bars, pub, restaurants, retailers and hotels sell and offer their customer a refreshing and tasty cocktail without the expertise of a highly trained cocktail bartender. Mixed Ape offers on-trade operators the opportunity for better inventory management with less time spent on stock control. They also benefit from less wastage, improved speed of service, reduction in bartender training cost and ability to deliver consistently high quality cocktails to their customers. This multi-award winning beverage comes in a pre-portioned and ready to serve 230 ML aluminium bottle. They boast of six popular alcoholic cocktails (10.5% ABV), which are Long Island Ice Tea, Sex on the Beach, Tequila Sunrise, Caipirinha, Mai Tai and a brand new energy cocktail called Niterox. The range also offers two non-alcoholic cocktails in Lime Time and Yellow Runner. Every cocktail is based on natural, high quality and fresh ingredients. It contains 55% fruit juices and high quality Rum, Vodka and Tequila (not ethanol). Mixed Ape quality is controlled in Belgium ensuring for consistency in quality. Mixed is also a winner of the prestigious Superior taste Award in 2010. Mixed-Ape is a brand owned and produced by the Mixed Ape Sprl. It was founded by Rene Uerlings, Mixed Ape founder and CEO, who created the brand in cooperation with experienced mixologist and designers in Belgium. T: +32 71 75 03 83
F: +32 71 75 03 90
info@nanocyl.com
www.nanocyl.com

Founded in 2002, **Nanocyl SA** is a leading global manufacturer of specialty and industrial carbon nanotubes (CNT's). Nanocyl is headquartered in Sambreville, in Wallonia, Belgium.

In addition to its carbon nanotubes (Nanocyl 7000), Nanocyl has developed a range of high added value solutions containing pre-dispersed carbon nanotubes. They are marketed under the names Plasticyl, Epocyl, Aquacyl, Biocyl, Pregcyl, Sizicyl and Thermocyl.

Nanocyl exports 95 % of its production. The Asia Pacific market does represent 50 % of its sales revenues. Nanocyl has subsidiaries in the U.S. and in South Korea. It is also well-established on the Asia-Pacific market through strong partnerships with distributors based in China, Japan, India, Malaysia and Singapore.

Thanks to their electrical conductivity properties, the products of Nanocyl are used primarily in plastic parts in automobiles (fuel systems and exterior parts), batteries, industrial equipments and in the electronic industry. The mechanical reinforcement of composite materials for sport articles are another example of the multiple applications in which carbon nanotubes offer unique properties.

Nanocyl takes part in various European research projects and also collaborates with universities worldwide, making the company a world centre of excellence with regards to nanotechnology.

1602 Vlezenbeek
T: +32 2 568 22 11
F: +32 2 568 22 21
info@neuhaus.be
www.neuhaus.be

The history of **Neuhaus** goes back to 1857, when Jean Neuhaus set up shop in Brussels with his brother-in-law in Galerie de la Reine. In the cellars below his premises he started to make bonbons, a confectionery that took off to such an extent that the pharmacy gradually became the first and foremost chocolate and patisserie business. In 1912, his grandson became the first to launch a chocolate coated bonbon, which he named the “praline”. Having grown over the years, the Neuhaus Group has today become an independent manufacturer of chocolate pralines, chocolate and quality biscuits. The company enjoys a world-wide reputation, operating mainly in the high-class praline market under the Neuhaus brand name. Neuhaus are Suppliers by Appointment to the Court of Belgium.

laundry equipment

Primus is one of the world's major manufacturers of commercial laundry equipment. Since our creation in 1911, we have built up nearly a century of expertise in developing a complete range of washer-extractors, dryers and ironers.

We manufacture all our products under one roof in our state-of-the-art plant in the Czech Republic. We relocated the plant over 15 years ago in order to remain competitive in the world market without compromising on quality. Because our plant is vertically integrated, we can control the quality of our products throughout the entire production process.

In addition to our ISO9001 and 14001 certifications, we also follow the RoHS and WEEE environmental directives. And our environmental awareness extends beyond production – our machines are equipped with state-of-the-art technologies to offer environmentally friendly solutions.

Thanks to an extensive dealer network throughout the world, Primus' offices serve customers in over 120 countries. Our headquarters are in Belgium, our production facilities are in the Czech Republic, and we have sales offices in France, the UAE and China.

Schröder Group GIE is specialised in the industry of public lighting fittings and is internationally recognised for its technical leadership and product innovation.

The Group has more than 40 companies spread over four continents.

The ranges of products manufactured by Schröder are:

- Public street lighting, from secondary roads to motorways.
- Urban, Decorative lighting (squares, parks and pedestrian areas).
- Floodlights for sport fields and façade illumination.
- Tunnel lighting, railway and metro lighting.
- Industrial lighting and large areas illumination.
- LED outdoor lighting for various applications.

Tianjin Lighting Schreder (TLS), established 1987 in TEDA, is a recognised supplier of public lighting in China. With the factory in Tianjin, offices in Beijing and Shanghai and local representatives all over the country, TLS gained many references, the most recent being the lighting of the Bund in Shanghai.

The Belgian Nuclear Research Centre, SCK•CEN, is a centre of excellence with more than 600 highly skilled collaborators. It has 50 years of experience and a tradition in 'first-of-a-kind' type of research projects. Among its unique assets we find the BR2 reactor, the materials research laboratory LHMA as well as the 220 m deep underground research laboratory HADES.

SCK•CEN features the MYRRHA ADS-project, combining waste transmutation with a versatile irradiation R&D facility. Next to education and training in reactor physics, operation, engineering, radiation protection, decommissioning and waste management, SCK•CEN offers a master degree in nuclear engineering (BNEN) in collaboration with the six major Belgian universities.

Silver Trans is a freight forwarder which is currently 30 years active in the Port of Antwerp. Our core activities include import and export of both general cargo and project cargo. To further develop our business, we have teamed up earlier this year with the company Van Moer Group. This partnership is a value for both parties. A warehouse covered with siding of + / - 75000m², a transport fleet of + / - 100 own trucks, a terminal that can store and handle dangerous goods and finally a terminal where containers can be cleaned and repaired. In short, an effective on-stop-shop for customers.

Sodexim was founded in 1963 with the objective of developing trade with China in several industrial fields.

In the course of its activity in China, **Sodexim** has obtained numerous orders for large and medium-sized projects in key sectors: power generation, steel rolling, machine-tools, glass production, chemistry, etc..

Sodexim acts as export agent and consultant for metallurgical equipment manufacturers, steel mills, chemical producers, engineering companies from Europe and the USA in industrial areas matching China's present priorities.

Sodexim also carries out import operations from China.

Sodexim established one of the first foreign representative offices in China, in 1979, presently located in the China World Trade Centre, Beijing.

www.stx-med.com

STX-Med is the leader in the field of medical applications thanks to the impressive expertise offered by its research and development team.

STX-Med's specific expertise lies in rationalising and simplifying sophisticated medical technologies to create simple systems and devices that are available to a wider public.

Its creative team uses the results of research carried out in medical laboratories to design electronic devices intended for medical, sporting or aesthetic applications.

STX-Med is commercialising a medical device so called CEFALY which is the first cranial neurostimulation device specifically designed for treatment and prevention of migraines and tension headaches. Neurostimulation medical technique has made huge progress. Thank to very precise electrical impulses it is now available to apply an external cranial neurostimulation on the trigeminal nerve.

New applications and treatments in the field of insomnia and epilepsy are under way of development. They will significantly improve the quality of live of thousands of persons.

F: +32 14 25 85 24
info@thebelgian.com
www.thebelgian.com

Founded in 1956, **The Belgian Chocolate Group** is a well-established supplier/exporter of premium chocolate products, offering high quality at attractive prices. Our wide range of products form a solid base for our brand "The Belgian" and includes Chocolate Seashells, Truffles, Pralines, Bars (regular & no sugar added), Hollow Figures and more innovative products such as Medaillons, Truffines and Chocolate Donuts. BCG has two production plants in Belgium with head-office in Olen and a regional sales office in Singapore since 2010.

"The Belgian" reflects the traditional chocolate making expertise from Belgium and has built a strong reputation amongst chocolate lovers throughout the world. Our brand name is associated with fine quality and delicious tasting products. We work together with exclusive distributors in over 70 countries creating a clear, unified brand presence. The unique combination of the finest ingredients, exclusive production methods and stringent quality controls, ensure the consistent excellence of our product. As quality is the highest requirement, BCG follows the international standards and guidelines and was granted the BRC A * level and the IFS Higher Level in January 2011. BCG was the first Belgian chocolate company to achieve these highest possible standards in each system.

General Director

THE BELGIAN ECONOMIC JOURNAL

Rue du Pesage 61
1050 Brussels
T: +32 2 219 44 66
masson.f@belgacom.net

The **Belgian Economic Journal** has been publishing for 3 years, every 3 months, a magazine in CHINESE " Let us discover Belgium", the Key for the Best.

The target is to make Chinese people discover Brussels, Belgium and Belgian companies, products, services. The trumps of Belgium as land where to invest and stepping-stone to European market are analysed. Other features: the Chinese living in Belgium, universities, design and art, research and development, European regulations...

To enhance exchanges and partnerships in all fields is the ultimate goal.

The magazines are free and available in the diplomatic representations of Belgium in China and China in Belgium. A selected regular circulation is organised in Chinese circles in Belgium and universities, scientific parks and associations in China.

The magazine is also posted on the website of the CCPIT:
http://www.ccpit.org/contents/channel_54/2010/0525/255037/content_255037.htm.

info@the-sniffers.be
www.the-sniffers.be

THE SNIFFERS

The Sniffers has more than 20 years of experience in delivering a wide range of services including:

- Fugitive emission management programs (Leak detection and repair programs).
- Flare loss and internal process loss management programs.
- Steam loss management programs.
- Tank emission management programs.
- Quick scan with infrared camera for VOC leaks.
- Pipeline inspection and – integrity services.

These services do not only considerably reduce the impact on the environment, but they also offer a great financial payback (through the reduction of raw material losses).

The Sniffers has a very extensive reference list, including a multitude of major oil and gas companies and chemical companies in Europe but also in the Middle-East (TAKREER, BOROUGE, ADMA, ADGAS, GASCO, ZADCO, SAMREF, QAFCO, QVC, QAFAC, EQUATE, MARGHAM).

T: +32 56 36 30 43
F: +32 56 37 21 96
info@traficon.com
www.traficon.com

Traficon is the N°1 reference in video image processing for traffic analysis and traffic safety. Traffic managers all over the world use this intelligent technology for vehicle and pedestrian presence detection, traffic data collection, automatic incident detection and management in motorway, tunnel, bridge and urban applications.

Traficon's reputation is backed by 25 years' proven field experience and more than 80,000 detectors operational worldwide. Traficon's automatic incident detection module is able to detect all major incidents within seconds: stopped vehicles, wrong-way drivers, queues, slow moving vehicles, fallen objects... This quick detection can save lives! Traffic in a city is very much affected by traffic lights. Intelligent detectors are designed to make traffic lights more dynamically. TrafiCam, Traficon's integrated video sensor, is used for both stop bar and advance detection at signalled intersections. Its main goal is to reduce vehicle waiting time, optimise traffic flow and reduce fuel consumption. Traficon also developed two products for intelligent pedestrian detection: Safewalk and C-Walk. These sensors improve pedestrian safety and reduce unnecessary delays to both pedestrians and motorists. Used in combination with the Traficam vehicle detection system, it is set to deliver the ultimate 'intelligent crossing'.

www.umicore.com

Umicore is a global materials technology group. It focuses on application areas where its expertise in materials science, chemistry and metallurgy makes a real difference. Its activities are centred on four business areas: Catalysis, Energy Materials, Performance Materials and Recycling. Each business area is divided into market-focused business units offering materials and solutions that are at the cutting edge of new technological developments and essential to everyday life.

Umicore generates the majority of its revenues and dedicates most of its R&D efforts to clean technologies, such as emission control catalysts, materials for rechargeable batteries and photovoltaics, fuel cells, and recycling. Umicore's overriding goal of sustainable value creation is based on an ambition to develop, produce and recycle materials in a way that fulfils its mission: materials for a better life.

The Umicore Group has industrial operations on all continents and serves a global customer base; it generated a turnover of € 9.7 billion (€ 2.0 billion excluding metal) in 2010 and currently employs some 14,400 people.

m.roemers@val-saint-lambert.com
www.val-saint-lambert.com

The crystal company **Val Saint Lambert** was founded in 1826 and represented the first Belgian enterprise specialised in the production of various articles in crystal.

Till 1970 Val Saint Lambert was the largest manufacturer of crystal in the world, they made glasses for the Tsars in Russia, chandeliers for the Maharajas in India and they also manufactured bathroom articles for the Orient Express.

After a few decades of silence the company has been taken over by the Onclin family.

Val Saint Lambert is re-launching and repositioning the company in presenting new articles, old restyled articles, a new identity and internal changes. The production stays in Belgium and is still made by hand.

The lines of production can be divided for one part by the classical range for which we can base us on a production history of nearly 2 centuries. On the other hand a new line, more modern with the characteristics of the classical line as are our colour and cutting (like the Kaleido collection).

We are going to produce collections with outside designers.

At *Maison et Objet* 2010 the new Val Saint Lambert was introduced to the world.

VAL SAINT LAMBERT is *Official Supplier to H.M. the King of Belgium*.

Founded in 1990, VHA is a Belgian innovator. For the Automotive industry we deliver high quality test and assembly solutions. VHA is a regular supplier to the final assembly plants as well as to the first tier suppliers.

A multifunctional team of engineers is designing and implementing application for:

- testing of components and sub-assemblies like but not limited to:
 - functional and in-line test of shock absorbers
 - testing of transmission units
 - testing of small valves
 - visual inspection of different components
- assembling with integrated test of assemblies for:
 - JIT and JIS assembly production lines
 - zero defect assembly of shock absorbers and other components
 - production, cutting and labeling of flexible tubes with a great variety of couplings
 - tools and textures.

Turn-key projects with integrated robots, tailor-made machines and software is one of our specialties.

VHA is already active in China for Atlas Copco, Tenneco Automotive and Barco.

T: +32 9 250 21 11
F: +32 9 251 62 64
infovcg@volvocars.com
www.volvocarsgent.be

Volvo Cars Gent is a daughter company of the Swedish Volvo Cars Corporation (Gothenburg). Since August 2010 Volvo Cars corporation is owned by the Chinese Zhejiang Geely Holding Group.

Volvo Cars Corporation has 20,000 employees worldwide. In 2010 it produced a total of 387,802 cars.

The most important manufacturing units are located in Sweden (Gothenburg) and Belgium (Gent). Next to that Volvo has a plant in Udevalla (Pininfarina Sverige) and a number of smaller plants where CKD production takes place (Completely Knocked Down : assembly in kits), namely in Malaysia and Thailand. Next to that cars are also assembled in China in cooperation with Ford.

95 percent of all production is exported. The cornerstone of work organisation in the factory is teamwork. The assemblers work in groups (teams) of around 12 people. Each team is co-ordinated by a team leader. The team is responsible for production, quality and maintenance and has far reaching responsibilities.

According to the principles of self-management, the team stands in for the most important indicators (Quality, Cost, Delivery, Improvement, Safety, Man and Environment).

The **Belgian Foreign Trade Agency** is a public body with legal status. It was set up through the Cooperation Agreement concluded between the Belgian federal government and the three Belgian regional governments in 2002.

The Agency is run by a Board of Directors. Its Honorary President is His Royal Highness Prince Philippe of Belgium.

The Agency's main tasks are to:

- Provide documentation on foreign markets.
- Organise joint economic missions.
- Collect, organise and circulate information, studies and documentation on external markets on behalf of the regional export promotion organisations.

The regional export organisations (AWEX, Brussels Invest & Export and FIT) remain the primary contact points for Belgian companies.

BRUSSELS invest & export is the foreign trade and investment agency of the Brussels-Capital Region. It aims to promote the internationalisation of the Brussels economy. Brussels is not only the Belgian and European capital, home of NATO and EU headquarters, but it is also a large business centre at the heart of the European market.

BRUSSELS invest & export assists Brussels companies operating in foreign markets. Almost ninety economic and trade commissioners across all continents provide free guidance to SMEs, target potential local prospects and partners, organise matchmaking visits... Concrete initiatives in Brussels and abroad include trade missions, contact days, buyers' invitations and collective stands at international trade fairs. Brussels exporters are listed in a database, www.brussels-exporters.be, which can be accessed by all foreign companies searching for partners.

Another mission of BRUSSELS invest & export is to attract foreign companies to Brussels and to provide them with support, should they decide to locate their business in the Region.

To enable investors to assess the benefits of establishing in the capital, BRUSSELS invest & export offers them a « Welcome Package » which includes equipped office space at no cost for a three-month period.

**Service Public
Fédéral
FINANCES**

Within the **Federal Public Service Finance**, a team of experts informs and assists foreign investors and those already established in Belgium on tax matters.

The Fiscal Department for Foreign Investments was created in 1997 and operates under the direct authority of the Chairman of the Executive Committee of the Belgian Federal Public Service Finance.

This service of the FPS Finance guides and informs foreign investors on tax matters and assists them in their contacts with tax authorities.

This public service works:

- free of charge on a flexible, non-bureaucratic and investor-orientated basis;
- on a strictly confidential basis, subject to legal and professional obligations of secrecy;
- for tax information regarding foreign investments in Belgium, please get in touch with us (address below).

Belgian Customs watches over the correct application of the European Union customs rules in order to offer the highest legal certainty and equality to companies importing and exporting goods. Belgium is the distribution centre *par excellence* because of its central location. Indeed, Belgium's small surface area counts many entrance gates; with the airport of Zaventem and Bierset and the harbours of Antwerp, Zeebrugge, Ghent and Liège as principal gateways. Behind these entrance gates lies the most dense multimodal network of railways, waterways and roads in the world.

Belgian customs support the position of Belgium as the European distribution country *par excellence* by:

- offering brisk export and import systems to have the dispatch of goods traffic passed off as quickly as possible;
- carrying out formalities for customs, excise, VAT with regard to import and rules for other public services in one operation according to the single window and one-stop-shop concept;
- establishing customer-oriented services across the territory.

The **Federal Public Service (FPS) Foreign Affairs, Foreign Trade and Development Cooperation** manages Belgium's foreign relations. Belgium's Foreign Affairs network is comprised of 130 embassies, consulates and representations both at home and abroad.

As an organisation with solid and long-standing experience in foreign relations, the FPS channels its expertise into actions geared towards the following objectives:

- Defending Belgian interests abroad.
- Promoting a stable, fair, and thriving world community based on solidarity.
- Combating global poverty by coordinating a high-level of cooperation.

The **Flanders Investment & Trade** agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises.

Whatever sector you are involved in, Flanders Investment & Trade will help you establish contact with the Flemish companies you are looking for.

This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers.

At another level Flanders Investment & Trade enhances Flanders' position as the gateway to Europe for inward investors. The Agency identifies, informs, advises and supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium.

This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of Flemish economy, but also an extensive network outside of Flanders.

We have just that for you. Do visit our website and discover our worldwide network. With over 90 offices we are bound to be conveniently located near you, wherever you are.

www.cerexhe.irisnet.be

Since entering office as Economy and Employment Minister of the Brussels-Capital Region in July 2004, **Minister Benoît Cerexhe** has endeavoured to increase the economic potential of the Brussels Capital Region and spent considerable effort to make it more attractive to investors and companies. By reviewing and simplifying the economic expansion legislation, Benoît Cerexhe has positioned Brussels as a leading city for business, open to new forms of entrepreneurship.

In 4 years time, over 40,000 net jobs have been created in the Brussels-Capital Region. Brussels also ranks amongst the cities with the highest rate of business starts per habitant, despite the economic crisis.

In July 2009, Benoît Cerexhe was re-elected and remained in office as Economy and Employment Minister. He will continue his policy to attract businesses and bring jobs to Brussels. During the constitution of the present **Government of the Brussels-Capital Region**, foreign trade was added to Benoît Cerexhe's attributions. This new competence will allow him to further support Brussels businesses in their development by aiming the foreign trade policy at Brussels entrepreneurs looking for new markets.

MINISTRY OF THE BRUSSELS-CAPITAL REGION
External Relations Department

The Ministry of the Brussels-Capital Region set up the External Relations Department in order to bring about a coherent foreign policy for the Region.

This Department prepares and monitors multilateral and bilateral issues and participates in international meetings and events, like the World and International Expos.

To meet its objectives, the External Relations Department has an extensive network of regional and city partners with which it concluded bilateral agreements. In China, the Brussels-Capital Region signed two agreements so far, one with the Municipality of Beijing (22nd September 1994) and one with the Province of Sichuan (new text signed on the 9th November 2010).

The Province of Antwerp is the driving force of the Belgian economy. It has the second biggest port of Europe, it is the centre of world diamonds trade and world second largest chemical industry centre. With its strategic location, its highly developed economy, its abundant history and culture heritage of Europe, its openness and tolerance, Antwerp is an attractive place to the foreign businessman and tourists.

Since 1985 the Province of Antwerp has built strong relations with China. It was the first Belgian province ever to sign an official friendship agreement with a Chinese Province, being Shaanxi. Since the signing of the agreement, many projects and co-operations have been carried out and have been realised in the fields such as poverty-relief, education, and culture. A representative office has been set up in Beijing.

The **Provincial Government of East-Flanders** is maintaining a longstanding cooperation with the Province of Hebei since 1991. The main focus of this cooperation is to support (East) Flemish companies in their search for economic opportunities in China, to assist East Flemish knowledge centers looking for cooperation in China and more recently to promote (East-) Flanders as an ideal investment region for Chinese investors. Additionally, the Provincial Government of East Flanders decided to broaden its geographic radius of action and is looking for structural cooperations in other important growth centers in North East China such as the cities of Shenyang, Qingdao and Tianjin.

In 2008 the most important East – Flemish institutions active in China decided to create a 'China Platform' - in which the Province of East-Flanders, the Ghent University, the City of Ghent and the Flanders Chinese Chamber of Commerce are the structural members - to combine their individual forces towards China. This resulted in the establishment of the "East Flanders Office" in Beijing, the East Flemish representation office of the Province of East Flanders and the Ghent University for the purpose of (East) Flemish companies interested in doing business in China, Chinese companies willing to invest in (East) Flanders and the Ghent University.

The **Wallonia Foreign Trade and Investment Agency (AWEX)** is the Wallonia Region of Belgium's governmental agency charged with promoting foreign trade and attracting foreign investment. The agency has a worldwide network of 107 economic and trade representatives. AWEX has been certified ISO 9001 since April 2002.

As a foreign trade agency, AWEX carries out a mission focused on promoting and informing the public of the many benefits of both Wallonia and its foreign business community. AWEX assists buyers, decision-makers, importers and foreign prospects by providing information on Wallonia's export potential. As an export partner for Wallonia-based companies, AWEX offers a wide range of export-oriented services and activities (market surveys, organisation of trade missions, trade show pavilions, export incentives, etc.).

As a foreign investment agency, AWEX has the overall responsibility for attracting foreign investment to Wallonia. This includes seeking out and providing information to potential foreign investors. The Agency also offers a pro-active follow-up service to investors already established in Wallonia. In addition, it is in charge of identifying new foreign investors for the acquisition of industrial sites under a restructuring process.

Wallonie

The Minister of Economy and Vice-President of the Walloon Government, Jean-Claude Marcourt, and his cabinet are charged with overseeing the economic and social development of Wallonia.

To the five clusters of competitiveness created under the Marshall Plan, with the goal of creating a solid economic and industrial environment (Transport and Logistics, Healthcare, Mechanical Engineering, Agro-Industry, Aeronautics and Space Industry), has been added a sixth one dedicated to the green economy.

Sustainable development is ripe with real opportunities for Wallonia to enhance its economy. In light of this belief, special attention will be paid to SME's and new technologies, which are also competencies of Minister Marcourt.

Located in the center of Europe, at the converging point of major roads, rivers, railways and air routes, Wallonia benefits from a high quality labor force and ample free spaces for the expansion of new economic activities; all advantages that Minister Marcourt, his team - in close collaboration with the Wallonia Foreign Trade and Investment Agency (AWEX) - will assert when promoting the benefits of Foreign Trade to the Region.

**Economic profile of Belgium,
the heart of Europe**

Belgium is a federal Kingdom comprised of three regions (the Flemish Region, the Walloon Region and the Brussels-Capital Region) and three communities (the Flemish, the French and the German Communities).

Belgium has an estimated population of 10.9 million inhabitants (2011) and is one of the most densely populated countries in Europe. Brussels is the 'Capital of Europe', playing host to the headquarters of the European Commission, the Council of Ministers and the European Parliament. Other major international organisations, such as NATO, are also located in Brussels. As a result, Brussels ranks as the world's number two city (after Washington, D.C.) in terms of the number of accredited journalists, and fourth in terms of the number of international meetings and seminars held.

With a surface of 30,500 km², Belgium is one of the smallest member states of the European Union. Nevertheless, it is a significant player in the world economy. GDP reached €339.0 billion in 2009 and an estimated €351.8 billion in 2010. In line with global deceleration, growth drastically slowed towards the end of 2008, and was negative in 2009 (-2.7%). In 2010, the Belgian economy recovered and a growth rate of 2.1% was recorded.

Despite the recent downturn, Belgium is a high income country, with a Gross National Income (GNI) per capita of US\$45,420 in 2010 (World Bank data).

According to the World Trade Organization (WTO), in 2010, Belgium was the 9th leading exporter of merchandise goods and the 15th leading exporter of commercial services. In 2010, Belgium's share in world merchandise exports was 2.7%. With a share of 2.5% in world imports of goods, Belgium ranked 12th among world importers.

For four years, Belgium has been holding the top position of the annual KOF Index of Globalization, which measures the economic, social and political dimensions of globalization.

In regards to Foreign Direct Investments, in 2010 Belgium ranked number 4 in the world with US\$62.0 billion. The continued presence of TNC (coordination centres), as well as new tax incentives that entered into force in January 2006 (notional interest deduction) play an important role.

TRADE RELATIONS WITH THE PEOPLE'S REPUBLIC OF CHINA

Belgium is indeed your ideal partner because of its strategic location in the heart of Europe, its flourishing economy with stable growth and the unwavering confidence of consumers and investors.

Belgian exports to the People's Republic of China	2007	12 months	€ 3,344.1 million
	2008	12 months	€ 3,424.2 million
	2009	12 months	€ 4,351.9 million
	2010	12 months	€ 5,426.6 million

Belgian imports from the People's Republic of China	2007	12 months	€ 12,526.2 million
	2008	12 months	€ 13,401.6 million
	2009	12 months	€ 10,529.0 million
	2010	12 months	€ 12,129.5 million
