

Signing Ceremony of 16 Economic agreements in Tokyo

Monday 5 December 2022 at 16:30-17:05

Venue: La Lune room, 41st floor, The Okura Tokyo

1. BEAL INTERNATIONAL – NISHIDA

- Founded in 1974, BEAL INTERNATIONAL is a Belgian family-owned company specialising in the design, manufacture and distribution of innovative products for the construction and decoration sectors. Among the range of products designed by BEAL INTERNATIONAL, it is in particular the MORTEX® coating of microcement or Tadelakt type, the BEALSTONE® product, a new Terrazzo generation, and the CAPILASIL® water repellent solutions for terraces, frontages and injection which made the reputation of the company. In more than 45 years of experience, BEAL International has developed a unique expertise and has become a world reference in multi-surface coatings microcement and Terrazzo.

Since 1999, BEAL has been developing the distribution of its Mortex and Bealstone brands in the Japanese market. BEAL continues to grow by doing commercial fairs and mostly through their 14 points of sale in the country, which allows them to make our products easily accessible to professionals. They also hold training sessions, in Japanese, on a regular basis. Today, with the help of 3 official trainers, they organise more than 4-5 training sessions per month in Japan and train more than 1000 people per year.

Belgian quality products & Japanese craftsmanship

The MORTEX and BEALSTONE products are high quality coatings entirely designed and manufactured in Belgium. The philosophy of the company BEAL is to create products to which professionals can give added value to achieve unique finishes. Indeed, they can play with the colours, the shades, the textures, the applications techniques, the tools, their expertise,... The Japanese know-how and the quality of their craftsmen in terms of coating and their unique way of doing things create a remarkable association and perfectly match to the products manufactured by Beal International.

Eco responsibility

The MORTEX® product is made in Belgium and consists of 95% naturally sourced ingredients from Europe.

The Granito/Terrazzo BEALSTONE® product is also made in Belgium and is composed of 97% natural ingredients sourced in Europe.

The formulas of these two products are neutral and can be pigmented by the craftsman directly on site, which allows for more ecological transport, as the products are much lighter and less bulky. This choice also avoids product losses and waste. The BEALSTONE® solution also favours the use of local aggregates, which considerably reduces its environmental impact.

This eco-responsible approach of BEAL in the very design of their products perfectly fits with the philosophy of the Japanese craftsman. It develops the local workforce and allows the Japanese craftsman to integrate his added value to the products, in addition to being able to use local materials and/or to recycle materials in our BEALSTONE® terrazzo in particular. (old marble, old tiles, crushed glass,...)

Company spirit

All the markets BEAL work with are a constant source of inspiration that allow them to evolve, improve and extend the techniques and fields of possibilities of their products.

Its development in Japan is a very beautiful story and it is certain that the Japanese culture, techniques and products are as unique for BEAL as BEAL products can be for their Japanese partners.

BEAL is passionate and creative. They manage to share and exchange with their Japanese customers and are proud to maintain particularly friendly relations with them.

2. BROUWERIJ DE HALVE MAAN – WORLD LIQUOR IMPORTERS CO. LTD.

- De Halve Maan Brewery will join HRH Princess Astrid during the economic Mission to Japan in December 2022. De Halve Maan Brewery is known in Japan for its famous “Brugse Zot” specialty beer. Since 2014, there is a “Brugse Zot Café” concept bar in Tokyo, that gives the brand a good exposure. During this Mission, De Halve Maan will renew an importation agreement with the well-known Japanese importer “World Liquor Importers” of Mr. Imazato.

Both companies have been working together for several years now, introducing Brugse Zot and Straffe Hendrik as Belgian Specialty beers in Japan. The partnership covers a cooperation for 3 years, with ambitious growth figures and brand development in Tokyo and other cities. Since 1856, De Halve Maan Brewery has been owned by the family Maes-Vanneste. Currently, Xavier Vanneste (6th generation) is managing the brewery. In 2005, the brewery was restarted with the launch of “Brugse Zot”. Since then, the brewery has probably been one of the fastest growing Belgian breweries, with an annual double digit growth. The brewery, located in the historical heart of Bruges, receives yearly more than 100.000 visitors from all over the world.

In 2016, the brewery was in the headlines with its innovative and world’s first beer pipeline project, transporting the beer between the brewery and bottling plant. Most recently the Brewery opened its brand new bottling facility, which focuses on innovation, ecology and international expansion.

3. BROUWERIJ ROMAN NV – EURASIA TRADING CO. LTD.

➤ **Japanese tempted by Belgian beer from brewery Roman**

On the trade mission to Japan in the presence of Princess Astrid from 03/12/2022 to 07/12/2022, a cooperation agreement will be signed between Roman Brewery and Eurasia Trading. This will give Belgium's oldest family brewery access to the Japanese market. "As the market leader in Belgian beers, Eurasia Trading is the right partner to bring our beers to Japanese consumers" indicates Export Manager Pieter Demerie. After previous contracts in China, Taiwan and South Korea, Japan is the next step in marketing Roman beers in Asia. "The interest in Belgian beer is on the rise in Japan" continues Pieter Demerie. "It is mainly our wheat beer and specialty beer such as Ename, Gentse Strop et Adriaen Brouwer that are in demand. Moreover, Japan is a country of traditions, people there have a lot of respect for a Belgian family business that already exists for 14 generations. We hope to realize a nice growth here together with Eurasia Trading." Starting January 2023, the first containers containing Roman beers will leave for Japan.

6. INCIZE – MODECH

➤ **This Monday, December 5, 2022, on the occasion of the princely mission, taking place in Japan from 5 to 9 December, [Incize](#) is formalizing its partnership with the Japanese firm [MoDeCH](#).**

Incize is an innovative Walloon company offering services looking to advance the technologies used for radiofrequency semiconductor applications. Founded in 2014 and based in Louvain-la-Neuve, with a focus on characterization and testing services, Incize's vocation is to accompany its partners throughout their product development cycle, thus supporting in bringing the world the most advanced technologies.

Founded in Hachioji city in 2002, MoDeCH is a leading player in the field of semiconductor on-wafer device modeling, aiming to transform the electronics design infrastructure, thanks to state-of-the-art tools for circuit modeling and simulation.

Wishing to reaffirm their mutual interest and bond, the Partners proceeded to the signature of a memorandum of understanding, laying out the foundations for a fruitful and mutually advantageous strategic partnership. Thanks to complementary offerings of services, the Partners wish to increase mutual support, in order to generate increased value for the semiconductor industry.

7. KAPITOL SA (trading as Infobel) – GLOCAL CONNECTIONS LLC

- Infobel and Glocal Connections have decided to set the path to the development of a new leader in the B2B data industry in Japan and Asia.

The emerging Japanese and Asian data market is extensively complex. It became also extremely technologically oriented, regulated and most companies abandon in front of those high entry barriers. Infobel and Glocal Connections have decided to build a cooperation that will innovate and fill the gap on this booming industry. By providing DaaS (Data as a Service) solutions to the Japanese and Asian companies they allow them to get access in their native languages to highly qualitative targeted data and to analyze and enhance their existing data for a much better use.

Infobel is a Leading Worldwide Location Data Company based in Brussels providing high quality B2B Global & Local Data through a DaaS (Data as a Service) platform destined for all industries. It is supported by fully automated proprietary technology. Glocal Connections provides cutting edge direct marketing and international communication services by connecting clients abroad with local experts, professionals and suppliers in Asian countries. Glocal Connections act as local agent in Japan and Asia. They have signed a MOU destined to reinforce and support their joint development in Japan and Asia in order to become leading data players.

8. LUCIAD NV (HEXAGON) – OSASI TECHNOS, INC.

➤ **Hexagon, OSASI partner for disaster management and prediction solutions**

(TOKYO, 5 December 2022) – Hexagon’s Safety, Infrastructure & Geospatial division and OSASI Technos Inc. announced a partnership to deliver next-generation disaster management and monitoring solutions. The wide area remote monitoring systems with 3D visualization capabilities will allow governments to detect, predict and simulate impending disasters, enabling them to better plan for and respond to emergency events. The news was announced today at a signing ceremony during the Belgian Economic Mission to Japan.

The partnership brings together OSASI’s advanced on-site sensors and monitoring solutions with the real-time situational awareness and location intelligence capabilities of Hexagon’s Luciad Portfolio. Combining on-site information, such as rainfall measurements and river water levels, with maps, 3D data and other information from third-party sources will provide advanced visualization and real-time

analysis to unlock insights for predicting and detecting landslides, mudflows, slope failures and other disasters faster.

“At Hexagon, our goal is to enable safer, smarter cities by providing governments and other organizations the tools they need to protect residents and visitors,” said Dirk Wagemans, senior vice president, commercial business, Hexagon’s Safety, Infrastructure & Geospatial division. “By partnering with OSASI to deliver next-generation disaster management and monitoring solutions, governments have greater access to information and insights that could mitigate impacts of disasters and save lives.”

“OSASI has been developing measurement instruments for the field and providing monitoring solutions for observation points through its information sharing services,” said Maki Yano, president of OSASI Technos Inc. “With this new partnership, we aim to develop a new disaster monitoring solution for a wider area based on time-series data from the past to the present, integrating weather, water, and geological data by using Luciad’s advanced visualization technology. By providing society with unprecedented intuitive information, we hope to contribute to disaster prediction and realize a safer society.”

Learn more about Hexagon’s Luciad Portfolio and OSASI’s remote surveillance products.

About Hexagon

Hexagon is a global leader in digital reality solutions, combining sensor, software and autonomous technologies. We are putting data to work to boost efficiency, productivity, quality and safety across industrial, manufacturing, infrastructure, public sector and mobility applications. Our technologies are shaping production and people-related ecosystems to become increasingly connected and autonomous – ensuring a scalable, sustainable future.

Hexagon’s Safety, Infrastructure & Geospatial division improves the resilience and sustainability of the world’s critical services and infrastructure. Our solutions turn complex data about people, places and assets into meaningful information and capabilities for better, faster decision-making in public safety, utilities, defense, transportation and government.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 23,000 employees in 50 countries and net sales of approximately 4.3bn EUR. Learn more at hexagon.com and follow us @HexagonAB.

About OSASI Technos Inc.

With the catchphrase "Communicating the Voice of the Earth," OSASI designs and develops measuring instruments based on its unique technology and know-how to protect irreplaceable lives and assets from natural disasters such as landslides, floods, and sediment disasters.

With the development of communication infrastructure, there is a growing demand for the construction of remote monitoring systems for disasters and emergencies.

OSASI is working daily to meet the diversifying needs of society by providing cloud monitoring services that allow data to be checked on the Web.

OSASI will continue to strive to provide better products with reliable technology to gain further trust from their customers.

9. NEOBULLES SA – GOLDHEART CO. LTD. – SHONAN TRADING CO. LTD

- Shonan Trading Co., Ltd announced that they aim to enhance the presence of Neobulles's products in the Japanese market with teaming up with "Gold heart Co., Ltd".
For more than 10 years, Shonan Trading Co., Ltd has been importing and selling successfully non-alcoholic beverages from Neobulles.

Although it's very hard to sell beer even if it's non-alcoholic at roadside service areas along the highways in Japan, Shonan Trading Co., Ltd already succeeded to sell Neobulles non-alcoholic beer "BIERE DES AMIS 0.0%" using Gold heart Co., network.

As a next step, Shonan Trading Co., Ltd and Gold heart Co., Ltd, will work together to develop their own "Sober Curious" bars, the non-alcoholic drink bars, at roadside service areas along the highways with only Neobulles's non-alcoholic products.

10. NEOBULLES SA – NOUAISON CO. LTD. – SHONAN TRADING CO. LTD.

- Shonan Trading Co., Ltd announced that they aim to enhance the presence of Neobulles’s products in the Japanese market with teaming up with “nouaison”
For more than 10 years, Shonan Trading Co., Ltd has been importing and selling successfully non-alcoholic beverages from Neobulles.

Mr. IWATA, CEO of “nouaison”, has over 20 years of experience in the restaurant industry, mainly for French cuisine. He worked for many years at one of the Japanese famous restaurant companies as a producer as well as a chef, and also has appeared on television. In December 2022, he will open his own casual French restaurant “nouaison” in Tokyo and he chose BIERE DES AMIS, beer and non-alcoholic beer of Neobulles, as the only beer served in his new restaurant. This exclusive beer line-up is highly expected to increase the BIERE DES AMIS fans.

11. NEOBULLES SA – SHONAN TRADING CO. LTD.

- As part of the Princely Mission led by Her Royal Highness Princess Astrid, which will be held from December 5th to December 9th 2022 in Tokyo, Nagoya and Osaka, Neobulles SA will sign a historical contract with the Japanese distribution company Shonan Trading Co. Ltd.

Philippe Stassen (CEO of Neobulles), Anne Stassen (Market & Product Strategist) and Carol Brugmans (Export Director) entrust us : "As the 3rd largest world economic power, Japan is a major partner of European countries in Asia. It represents the 7th largest export market for the European Union and for Neobulles, Japan takes the first place in terms of export market for our Bière des Amis 0.0%."

Export markets are the driving forces behind the growth recorded by Neobulles in 2021, with a sales increase of 70% for all export markets combined, and more particularly in Japan where sales volumes have doubled in the past year.

Neobulles owes this expansion to its collaboration with the Japanese company Shonan Trading Co. Ltd, a beverage distribution company that is active in both the On- and Off-Trade with a wide range of beers such as Bière des Amis with and without alcohol, but also with sparkling wines especially created for the Japanese market under the brand “Duc de Montagne”, or with still wines with Vintense Cépage 0,0%.

And the growth prospects for 2023 in the Japanese market are delightful, with numerous range extensions and product innovations such as the Vintense Cépage organic range, a range of aperitifs based on non-alcoholic wines such as The Fortune Bar Sangria and The Fortune Bar Mulled Wine, as well as three new Bière des Amis (IPA, Fruity and Triple) of which the first two will also be available in the non-alcoholic version.

This Economic Mission will therefore be the perfect moment for Neobulles to seal this long-standing partnership through the signing of a historic collaboration contract. A way to formalize a perennial collaboration based on common values such as Trust, Flexibility in Innovation and Respect of the family company values.

For this occasion, there will be visibility on Neobulles products as well as Neobulles brands Vintense and Bière des Amis during the Gala evening of the Princely Mission.

15. TAKEDA LESSINES – TAKEDA

➤ **Takeda Lessines reinforces its ambitious sustainability goals**

Tokyo – 5 December 2022

Today, Japanese biopharmaceutical company Takeda endorsed its ambitious sustainability goals for its Lessines production site with a protocol, signed by Takako Ohyabu, Chief Global Corporate Affairs & Sustainability Officer and Geoffrey Pot, General Manager of the Takeda site in Lessines. The signing took place on the sidelines of the Belgian Economic Mission, in the presence of Her Royal Highness Princess Astrid and members of the Belgian federal and regional governments.

Takeda bows on more than 240 years of history, and has a strong tradition of sustainability, for patients, people and the planet. Its operations have been carbon neutral since 2020, and the company aspires to operate carbon-zero by 2035.

"In Lessines, we have the ambition to go one step further and achieve this goal already by 2030, thanks in part to the recent investment of almost EUR 300M in a new production facility," says Geoffrey Pot, General Manager of the Lessines site. "We take the opportunity today, with the signing of this protocol, to reinforce our ambitious sustainability goals, and to support the Belgian authorities in achieving their own sustainability targets."

16. TWEDDLE GROUP BELGIUM – YAMAGATA CORPORATION

- We are pleased to announce the signing of a Memorandum of Understanding between Yamagata Corporation and Tweddle Group Belgium. This agreement will drive additional business for both partners by sharing the tools, software and services that have made each successful in their respective markets.

Built on a foundation of mutual trust, the cooperation between the two organizations is a logical fit. By combining Yamagata's strength in creation and translation services and Tweddle Group's background with custom content solutions, each organization can optimize their shared expertise in technical authoring, content transformation, and training. The two also complement one another very well in terms of locations, customer relationships, and product offerings.

We are honored to participate in the Belgian Economic Mission to Japan and look forward to the success of this profitable cooperation between Yamagata Corporation and Tweddle Group Belgium.
