

MOST IMPORTANT  
PRODUCTS EXPORTED  
BY BELGIUM  
IN 2016

## Preliminary remarks

The International Trade Centre (<http://www.intracen.org/tradstat/>) regularly provides information on the import and export performance of over 220 countries and territories and examines some 5,300 products of the Harmonized System. This research is done in collaboration with the World Trade Organization (WTO) and the United Nations Conference on Trade and Development (UNCTAD). The most important products exported by Belgium are listed on the website of the ITC under the heading “Exports 2001-2016 International Trade in Goods Statistics by Product Group” and more specifically “Exports” and “Belgium”.

The Belgian Foreign Trade Agency has not only searched for products for which Belgium is a major exporter but has also calculated Belgium’s share in total world exports of each of the selected products.

Using the Intrastat nomenclature (the number precedes the product) the different products for which Belgium is the 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup> or 5<sup>th</sup> exporter are mentioned in descending order of importance.

When reading this list, some questions may arise. For example, does Belgium really cultivate bananas? The answer - of course - is no, at least not on a commercial scale.

The presence of bananas and other non-typical Belgian products on the list of the most exported products can be explained by the fact that export data are based on the community concept that, contrary to the national concept, takes into consideration the import and export transactions carried out by VAT registered non-residents without the intervention of residents. Returned goods are also taken into account.
